Training plans

LET'S
GET
RUNNING 

Want to last the course? Set up a routine you know you'll stick to.

Run with a partner or group to make training more fun – friendly rivalries will encourage you to raise your game. Make progress by challenging yourself, and keep runs varied to improve your speed, endurance, time and to tackle weaknesses. You don't need to smash your personal best every time, but the more you practice, the easier 10K will get and the more you'll enjoy it.

Beginner

For those who are fairly new to the running scene. Get all the basics you need to get to the finish line smoothly.

Intermediate

For those who are looking to take a step up, vary their training and improve their time.

Advanced

For experienced 10K runners, searching for that elusive PB.

Pace guide for all plans

Run Gear 1 (G1)

Easy conversation pace, if you aren't able to talk, slow down!

Gear 2 (G2)

Breathing starts to get a little more strained but you can still manage a short sentence. Comfortably hard or 7 out of 10/70% effort.

Gear 3 (G3)

Breathing is deep but rhythmical – working hard, 75% to 80%. For more experienced runners this would be roughly 10k race pace.

Gear 4 (G4)

Hard running – could say a word or so. Less control over breathing. Probably only maintain this for 10mins before slowing down significantly. Feel the lactic burn! 85% effort.

Gear 5 (G5)

Flat out sprinting. Wouldn't be able to speak at all! 10–20sec all out effort.

Key

Fartlek

Loosely translates as 'speed play', these are continuous runs where you vary your pace and effort for set periods of time.

Strides

Short 20 sec relaxed sprints, focusing on tall posture and a fast smooth turnover of steps. Run 5–6 sprints with a jog/walk back to your starting position after each one.

Short hills

A steep climb that takes 30–40 sec to run up. Run these at a fast pace/effort. Walk back to the bottom each each one.

Long hills

A climb that takes 60–80 sec to run up. More of a grind – run these at steady pace/effort. Slowly jog back to the bottom after each one.

Strength – core

60 secs of each of these 6 exercises in turn = 1 round. See plan for number of rounds. (Video link: [Let's Get Running Core Workout](#))

Strength – legs

10–15 reps of each of these 6 exercises in turn = 1 round. (If in gym substitute leg press for squats or lunges.) (Video link: [Runners Conditioning Workout](#))
