social: @eugrdrn

Passionate software engineer based in Moscow metropolitan area.  
I focus mostly on full stack web and iOS development.

## Experience

### 2021-22 Chatfuel, Senior Frontend Engineer, iOS Engineer

- Leading development of iOS native app

### 2019-21 Chatfuel, Frontend Engineer

- Working in the team that successfully launched following product's core features: WebGL based visual editing tool, Instagram integration, reimagined pricing system
- Participated in hiring, resource and process development (architecture reviews, code review and code styling best practices, CI/CD)

### 2019 JayDevs, Mobile Developer (part-time)

- Conducted and developed two social networking mobile applications @ NDA

### 2017-19 EPAM, Software Engineer

- As a BE @ Adidas mobile app team responsible for LAM countries expansion besides regular product features I've reduced TTI of mobile app checkout process for 15% by migration on newer API, designed and developed sharable validation contract for usage on mobile and backend sides  
<https://apps.apple.com/de/app/adidas/id1266591536>
- Implemented MVP of graph data visualization management tool @ the largest Russian bank
- Team leading experience
- Participated in resource development

## Contribution & Volunteering
