Methodology

The Real Estate Board of New York’s (REBNY) Quarterly Residential Sales Report is New York City’s most comprehensive compilation of residential sales data. The report captures the citywide and by borough breakdowns of closing data for condominiums, cooperatives and one-to-three family dwellings by analyzing official data from NYC Department of Finance’s Automated City Register Information System (ACRIS) and Perchwell – a company providing comprehensive real estate data.

REBNY’s Quarterly Residential Sales Reports track recorded residential sales closings, active residential listings and signed residential sales contracts, as well as average price and price per square foot of residential listings, and media price and median price per square foot of residential listings. The report also includes by borough maps indicating the City’s “hottest neighborhoods.” All REBNY research reports can be found at go.rebny.com/Reports.

KEY TERMS

Recorded Sales/Closings

Recorded sales are all units that have closed throughout the quarter, including condominiums (condos), co-operatives (co-ops), and 1-3 family dwellings. As classified by the NYC Department of Finance, building classes considered include –

- Condos: R1, R2, R3, R4, and R6
- Co-ops: C6, C8, D0, D4, and R9
- 1-3 Family Dwellings A1, A2, A3, A4, A5, A7, A9, B1, B2, B3, B9, and C0

Active Listings

Active listings reflect every unit that is currently marketed on the Perchwell database. Active listings do not include shadow inventory, which are units that have not yet come to market.

Contracts Signed

Contract signed data includes all units that are currently under contract, publicly marketed on the Perchwell database. This data does not include units that are not publicly listed. The price points in the contract signed data does not necessarily reflect final sale price.

Sources:

Data on all recorded sales closings is provided by the NYC Department of Finance’s Automated City Register Information System (ACRIS). Active and in-contract residential listing data, as well as bedroom type data for sales closings is provided by Perchwell.

Active and In Contract Listings: [Perchwell](#) provided all data for active listings and units in contract.

Average Price and Average Price Per Square Foot (PPSF)

The average price per square foot is calculated by all average prices divided by average square footage. Average Price and Average PPSF provides values that are not skewed by high or low outlier prices.

Median Price and Median PPSF

The median price per square foot is calculated by all median prices divided by median square footage. Median Price and Median PPSF represent the midpoint price, where half of the prices fall either above or below this value.

Neighborhoods

All neighborhood regions and boundaries are defined by REBNY. Data on each neighborhood can be downloaded here: go.rebny.com/Q12020AppendixData.

Total Consideration

Total consideration refers to the total sales volume for a given asset class or geographic area.
