

FALL 2002

Burton P. Resnick, Chairperson Steven Spinola, President

## A Note From The President

Our latest REBNY Retail Report confirms New York's top rank as a global marketing center and shopping destination. Rents and vacancy rates are improving in all prime areas despite a sluggish economy, except for downtown whose circumstances are unique. In fact, at the Board's November Members Luncheon, the panelists agreed that strong retail rents were elevating building sales prices in these sections of town. But vacancies are on the rise in secondary retail districts, however, another sign that any significant realty tax hike could also dim hopes for a near-term recovery in most of the city's shopping districts. Raising taxes in these tough times would force many stores to go out of business and deprive New York the payroll and sales levies they generate.

Readers will find a new feature has been added to our report. The Statistical Summary Spotlight provides a more accessible and comprehensive view of what is happening in the most widely patronized shopping districts.

We're grateful to our Retail Task Force Study Group for their customary fine work and for an alert that should be heeded.

Steven Spinola

RETAIL REPORT

## STREETTALK

## Leading Retail Districts Flourish While Secondary Shopping Areas Lag

Prime Manhattan retail areas, particularly their avenue locations, continued to thrive during the past six months, while secondary districts and stores on side streets saw significant increases in available space.

With the exception of Lower Manhattan, average asking rents for retail space are up in every core shopping district, surpassing levels reached six months or a year before. In line with that finding, the amount of available space in these prime areas would be unchanged if not for the sizable store vacancies downtown. Lower Manhattan's economy, of course, contends with both a recession and aftershocks from the terrorist attacks.

Leasing activity was most intense in places noted for their pedestrian traffic and high advertising value, such as Times Square and 34th Street in Pennsylvania Station's immediate vicinity. Stores near high-income, high-density residential neighborhoods, such as those on Broadway north of Lincoln Center, also attracted tenants. Leasing patterns in these prime areas were unaffected by such negative trends as local job losses, a recent dip in consumer confidence and a shortening list of the few remaining luxury goods purveyors—foreign and domestic—who have yet to take a Manhattan outlet. These problems, however, have been more that offset by other national and offshore retail chains seeking greater visibility or "showcase" Manhattan shops. In addition, banks, telephone equipment stores and drugstores were leasing as much desirable space as possible, with banks showing a preference for corner locations. These tenants have stabilized retail rents in Manhattan's main shopping venues during a period of economic uncertainty. Secondary areas, though, are contending with the recession's impact.

## STREETTALK

## Leading Retail Districts Flourish While Secondary Shopping Areas Lag (Continued)

Brokers report that retail rents rose in all key markets during this period. Some tenants anticipated a softening in rents after the terrorist attacks and sought concessions, but owners, refinancing at lower interest rates, could more easily afford to wait with vacant space while pursuing the rents they sought. The industry's view is that retail rents are generally rising in prime districts.

A list of retail tenants that made major commitments to Manhattan during the past six months, including several making their debut in this market, is appended to the report.

The Retail Report will continue to feature this Street Talk column as a preface to our statistical survey. Street Talk will include impressions, anecdotes and predictions from REBNY's Stores Committee Advisory Group.
