

BIOS222

Pathology and Clinical Sciences 2 and 3

General information

Awards	Subject type	Study year	Study Semester
Bachelor of Health Science (Naturopathy)	Core	Year 2	Semester 4
Bachelor of Health Science (Clinical Nutrition)	Core	Year 2	Semester 4

EFTSL: 0.125

Delivery mode: Livestream and Online

Co-requisites: BIOC211

Pre-requisites: Nil

Subject overview

This advanced pathology subject expands on the knowledge gained in Pathology and Clinical Science 1 (BIOC211), and considers disorders related to sensory organs such as eyes, ears, nose, and throat, and other systems of the human body including the blood, skin, musculoskeletal, endocrine, nervous, and reproductive systems. This subject further considers disorders that affect more than one body system, giving students an opportunity to look at multisystem disorders and their management. Upon successful completion of this subject, students should be able to apply the knowledge of basic pathophysiological processes to analyse and critically evaluate clinical features, diagnostic tests, management and to understand the basis for differential diagnosis of the relevant disorders covered in this subject.
