- Livestream sessions: Students must attend at least 80% of all livestream sessions.
- On-campus sessions: Students must attend 100% of all on-campus sessions.

Co-requisites: BIOP311

Pre-requisites: HMCL211

Subject overview

Naturopathic Clinical Skills 2 focuses on developing client-practitioner rapport, clinical case taking and the integration of clinical examination techniques to bridge the gap between classroom theory and clinical practice. This subject enhances students' abilities to evaluate and manage clients through case taking, health assessment, and therapeutic planning in accordance with all relevant laws and legislation to this practice. Students will observe peers and lecturers taking cases and engage in clinical case discussions and will further emphasise the development of clinical analysis, case management skills, therapeutic strategies within the framework of naturopathic philosophy, theory and legislative requirements.

As this subject builds into client-facing consultations, this subject requires the student to maintain 100% attendance across both the livestream and the on-campus timetabled classes for the full 12 weeks.

As per the resource requirements, you will need a valid first aid certificate HLTAID011 Provide First Aid (VET unit of competency) prior to attending the on-campus component of this subject.
