Diploma of Health Science	Elective	Year 1	Semester 1 or 2

EFTSL: 0.125

Delivery mode: Online

Co-requisites: Nil

Pre-requisites: Nil

Subject overview

This subject provides an overview of the historical and philosophical foundations of traditional whole medical systems, tracing their evolution from ancient times to the present. This subject will examine how social, cultural and political factors have shaped healing practices alongside advancements in anatomy, philosophy and other sciences, including contemporary naturopathy. By exploring the philosophy of health, students will gain essential insights into the principles guiding naturopathic practice, fostering a deeper understanding of this, the unique role of naturopathy within modern healthcare, and the philosophical commonalities and distinctions of naturopathy when compared with other health disciplines.

Assessments

- Week 5: Written Assignment
- Week 10: Recorded Presentation
