HOMC121

Homeopathic Acute Prescribing

General information

Awards	Subject type	Study year	Study Semester
Bachelor of Health Science (Naturopathy)	Elective	Year 4	Semester 7

EFTSL: 0.125

Delivery mode: Online

Co-requisites: Nil

Pre-requisites: HMCL312

Subject overview

This subject equips students to apply homeopathy's fundamental principles in the treatment of common acute and first aid conditions. It covers the homeopathic concepts of health and disease, the purpose of homeopathic human pathogenetic trials and the processes of collecting, preparing, storing, and dispensing medicines in a homeopathic pharmacy. Students learn about Occupational Health and Safety, Therapeutics Goods Administration (TGA) requirements, and case taking and analysis using simple reportorial matrices. The subject also emphasises the importance of recognising when to refer clients for chronic homeopathic treatment, and to other complementary and alternative medicines, allied health, and medical practitioners.

Assessments

- Week 5: Online Quiz
- Week 10: Written Assignment
