- Week 13: On campus practical exam (1 day per week)

Attendance requirements:

- Livestream sessions: Students must attend at least 80% of all livestream sessions.
- On-campus sessions: Students must attend 100% of all on-campus sessions.

Co-requisites: BIOP212, SOCA221

Pre-requisites: Nil

Subject overview

The first clinical skills subject introduces students to the principles and decision-making processes that will support effective professional and safe management of clients in clinical practice. Blending natural medicine philosophy and principles and evidence informed practice, students will develop a framework for decision-making, communication and client management preparing students for supervised clinical practicum.

As this subject builds into client-facing consultations, this subject requires the student to maintain 100% attendance across both the livestream and the on-campus timetabled classes for the full 12 weeks. Practical exams will be held onsite at the end of this subject.
