

SOCA321

Evidence Based Approaches in Complementary Medicine

General information

Awards	Subject type	Study year	Study Semester
Bachelor of Complementary Medicine	Core	Year 3	Semester 6

EFTSL: 0.187

Delivery mode: Online

Co-requisites: Nil

Pre-requisites: SOCQ121

Subject overview

This subject builds on the underpinning knowledge acquired within the subject SOCQ121 Foundations of Critical Enquiry and provides the opportunity for students to evaluate and discuss different research methodologies in complementary medicine within their application for real world practice. Students will learn principles of balanced research for the purpose of critically evaluating evidence-based research in complementary medicine.
