

Secure AI shaped by our work with political leaders.

Government *needs to work differently.*

Around the world, governments face the same challenge: rising expectations, constrained resources and systems built for a different era. Citizens want services that are faster, smarter and more responsive.

AI makes this possible. Not as another IT project, but as a new capability at the centre of government –

one that strengthens every decision, accelerates every service and makes every investment go further.

Most AI solutions available today were not built for government. They lack the security, flexibility and institutional understanding that leaders require.

CentreAI was built to fill that gap.

“If I were prime minister today, I’d govern differently.
Technology and AI are changing everything and giving leaders
the *opportunity to reimagine the state itself.*”

COUNTRIES WHERE
TBI WORKS

THE PLATFORM

CentreAI is TBI’s flagship platform of AI capabilities, purpose-built for government and its unique workflows, timelines and constraints.

CAPABILITIES

Navigate

Fully customisable workflows power manual tasks like rapid information synthesis, drafting briefs and speeches, or summarising documents.

Policy

Turn complex issues into evidence-led policy options, with a view of global precedent and a set of policy options with explicit trade-offs.

Codify

Convert the statute book into structured, machine-readable law, bringing clarity and transparency for all those who use it.

ENABLER

Drive

Instant search, analysis and briefing from your own institutional knowledge. Memory that survives when people leave.

BY

WHAT MAKES CENTREAI DIFFERENT

Configured to your security needs

Total optionality from open source to fully private LLMs. Choice of sovereign cloud hosting.

Institutionally intelligent

Immediate access to all vital internal knowledge. Not a generic chatbot.

Designed for governments

Pre-built workflows that reflect how leaders and officials work.

Trusted and connected

Transparent sources by default. Interrogate your own documents securely.

HOW WE WORK

AI designed for government. *Delivered with government expertise.*

CentreAI brings secure AI into the knowledge, policy and decision workflows of government. But technology alone does not transform how government works.

TBI combines CentreAI with deep government expertise to help leaders make better use of knowledge and evidence, redesign how work gets done and build the capability to sustain change. Our advisors, engineers and delivery teams work alongside government from identifying where AI can create real value through to implementation and adoption.

HOW WE ENGAGE

01 Discuss needs

Work with your teams to identify where AI can create real value, agree the priority use cases, and set the data access and governance foundations.

02 Customisation

Configure the platform to your security requirements, choose your hosting model and build the workflows your officials use.

03 Pilot

Go live with a defined pilot cohort. Embedded TBI experts support adoption and evaluate usability, performance and security.

04 Train and scale

Train users and super-users, quantify impact and jointly establish the operating model to scale from pilot to a full user group.

OUR PEOPLE

Our team includes former prime ministers, senior military commanders, chiefs of staff, global policy experts, delivery specialists and engineers. We understand how government works because we have led it.

CentreAI was built by TBI's dedicated AI innovation team of data scientists, engineers and software developers, and has been uniquely developed to address policy priorities, drive operational productivity, and enable governments to use AI confidently, repeatedly and at scale.

OUR PARTNERS

We have strategic partnerships on data infrastructure, cloud, compute and data centres. These include frontier labs, hyperscalers, internet providers and world-leading investors.

We bring global expertise as well as local operators.
