CENTRE MONDIAL DU CYCLISME
UCI
WORLD CYCLING CENTRE

UCI COACH DEVELOPMENT PROGRAM

The **Coach Development Programme (CDP)** is designed to provide coaches with the opportunity to study and practice all aspects of coaching the cycling disciplines under the expert guidance of the UCI World Cycling Centre (WCC) team.

The programme is designed to increase levels of knowledge and expertise in all areas of cycle coaching and candidates will be exposed to more than one cycling discipline.

QUALIFICATION LEVELS

The **UCI CDP Level 1 online** coaching course is the first step in the UCI WCC coaching pathway (online format).

The **UCI CDP Level 2** is aimed at new coaches who passed level 1 online, those working with younger riders or developing athletes.

The **UCI Level 3 (Diploma)** is aimed at experienced coaches who will be working either with their National Team or with National level riders. The candidate with a bachelor degree in Sport and Sciences can join directly the level 3.

The Certificate of Advanced Studies (CAS) in Sport Cycling Coaching is a unique 4-month part-time (presential and online) international continuing education program in cycling coaching, which combines academic theory and practical application. In collaboration with Lausanne university (UNIL) launched in 2022.

The exposure to athletes and the knowledge gained from both qualifications will allow each coach to develop in multiple roles - from working with talent identification, developing young riders through to elite level cyclists looking to compete at a world level.

The WCC can assist you in choosing the right level.

DATES & COSTS

Coaching level 2 including mechanics level 1 (if the candidate doesn't have the UCI level 1, they will need to pass it before arriving to the coaching course level 2, include in the price)
