

# Liste des Modèles homologués de kits cadre

Liste des modèles de cadres et fourches homologués (jusqu'au 31.12.2020)

## List of Approved Models of Framesets

List of approved models of frames and forks (until 31.12.2020)

Version 2023.07.07

### Homologation

La procédure d'homologation des cadres et fourches de bicyclette est entrée en vigueur le 1<sup>er</sup> janvier 2011 conformément à l'article 1.3.001bis du règlement UCI. A partir du 1<sup>er</sup> janvier 2021 celle-ci à évolué vers une procédure d'homologation des kits cadre (prise en considération de la tige de selle et des éléments entre la potence et le tube de direction en plus du cadre et de la fourche).

Tous les nouveaux modèles de cadres et fourches utilisés par des licenciés lors des épreuves de route (RD), piste (TR) ou cyclo-cross (CX) doivent être homologués selon les exigences du Protocole d'Homologation des Cadres et Fourches disponible sur le site internet de l'UCI.

L'octroi de l'homologation par l'UCI certifie que le nouveau matériel respecte les exigences de forme requises par le règlement UCI. A partir du 1<sup>er</sup> janvier 2019 cet agrément oblige un fabricant à attester, le matériel a été testé et respecte toutes les normes de sécurité en vigueur, conformément à l'article 1.3.002 du règlement UCI.

Les modèles sujets à la procédure d'homologation sont :

- tous les nouveaux modèles de kits cadre utilisés par les licenciés lors d'une épreuve route, contre-la-montre, piste ou cyclo-cross,
- tous les modèles de kit cadre à l'état de développement à la date du 1<sup>er</sup> janvier 2011 n'ayant pas encore atteint le stade de production (la date du bon de commande des moules faisant foi),
- toutes les modifications apportées à la géométrie de modèles existants à partir du 1<sup>er</sup> janvier 2011.

Les modèles dans le commerce, déjà fabriqués ou au stade de production à la date du 1<sup>er</sup> janvier 2011 ne sont donc pas concernés par la procédure d'homologation durant la période de transition. Cependant, les modèles non homologués doivent dans tous les cas être conformes au règlement technique de l'UCI (articles 1.3.001 à 1.3.025) et restent soumis au contrôle des commissaires durant les épreuves.

Au terme de la procédure d'homologation, les noms des kits cadre homologués, le nom du fabricant, les tailles contrôlées, la date d'homologation, la discipline concernée et le code d'identification du modèle sont inscrits sur la Liste des Modèles homologués de kits cadre, disponible sur le site internet de l'UCI. Cette liste est actualisée à mesure que de nouveaux modèles obtiennent l'homologation.

Les modèles homologués sont autorisés en compétition à partir du jour de publication dans la Liste des Modèles homologués de kits cadre. L'utilisation d'un kit cadre et d'une fourche homologuée reste toutefois soumise à l'article 1.3.006.

### Approval

*The Approval Procedure of bicycle frames and forks came into force on 1 January 2011 in accordance with Article 1.3.001bis of the UCI Regulations. Starting from 1 January 2021 the Approval Procedure has evolved into the Frameset Approval Procedure (taking into account the seat post and components between the head tube and the handlebar stem in addition to the frame and the fork).*

*All new models of frames and forks used by licence holders in road (RD), track (TR) and cyclo-cross (CX) events must be approved on the basis of the Approval Protocol for Framesets available from the UCI website.*

*Approval by the UCI certifies that the new equipment meets the shape requirements set out in the UCI regulation. Starting from 1 January 2019 this approval requires a manufacturer to attest, the material has been tested and respects all security norms in force, in accordance with Art 1.3.002 of the UCI regulations.*

*The models which are subject to the approval procedure are:*

- *all new models of framesets used by licence holders in road, time trial, track or cyclo-cross events,*
- *all models of framesets under development on 1 January 2011 which had not yet reached the production stage (the date of the order form of the moulds is evidence),*
- *any changes made to the geometry of existing models after 1 January 2011.*

*Models on the market, at the production stage or already manufactured on 1 January 2011 are not required to be approved during the transition stage. However, the non-approved models have to comply in any case with the UCI technical regulations (Articles 1.3.001 to 1.3.025) and are subjects to the commissaires decision during events.*

*At the end of the approval procedure, the names of the approved models of framesets, together with the manufacturer's name, the sizes checked, the date of the approval, the category involved and the identification code are added to the List of Approved Models of Framesets, available from the UCI website. This list is updated whenever new models are approved.*

*The use of approved models is permitted in competition from the date of publication in the List of Approved Models of Framesets. The use of approved frames and forks remains subject to Article 1.3.006.*
