

## UCI HEIGHT CATEGORY LABELS - Visual Guidelines

### HOW TO USE THIS MANUAL

This manual provides guidelines to ensure that consistent standards are maintained when applying the UCI Height Category Labels on all materials. Any deviation from the specifications outlined in this manual must receive approval in writing from the International Cycling Union. No other interpretations of these specifications are permitted.

### PURPOSE

The UCI Height Category Labels represent the symbol of proof that the respective bicycle has to comply with the respective Height Category requirements of the UCI Regulations, Article 1.3.023. It is an obligation for all UCI License Holders to place the UCI Height Category Label on the bicycles used in the Individual Events on both Track & Road. These Labels will be the point of reference for the UCI Commissaires in their function to control and police the ability of a bike to be admitted to the competition.

### SCOPE

The UCI Height Category Labels must be used at all UCI sanctioned events listed below:

	<b>UCI Height Category Label is required</b>
<b>Road:</b>	
Individual Time Trial	YES
Team Time Trial	YES
Team Time Trial Mixed relay	YES
<b>Track:</b>	
Individual Pursuit	YES
Team Pursuit	YES
500m / 1km	YES

### APPLICATION

The UCI Height Category Label must be applied on a frame, the upper side of the top tube area (see below). The UCI Height Category Label can be applied in different ways but is not required to be an integral part of a frame. This step is left at the discretion of the UCI License Holders. In any case, the UCI Height Category Label cannot be covered and therefore must be visible at all times. It is necessary to ensure the label is resistant to regular cleaning as well as to unfavourable weather and climate conditions.

**Please note:** a bicycle without the UCI Height Category Label will be measured by the UCI Commissaire under the Default Measurements as per Article 1.3.023.
