12.5 UCI WORLD CHAMPIONSHIPS NATIONS RANKING

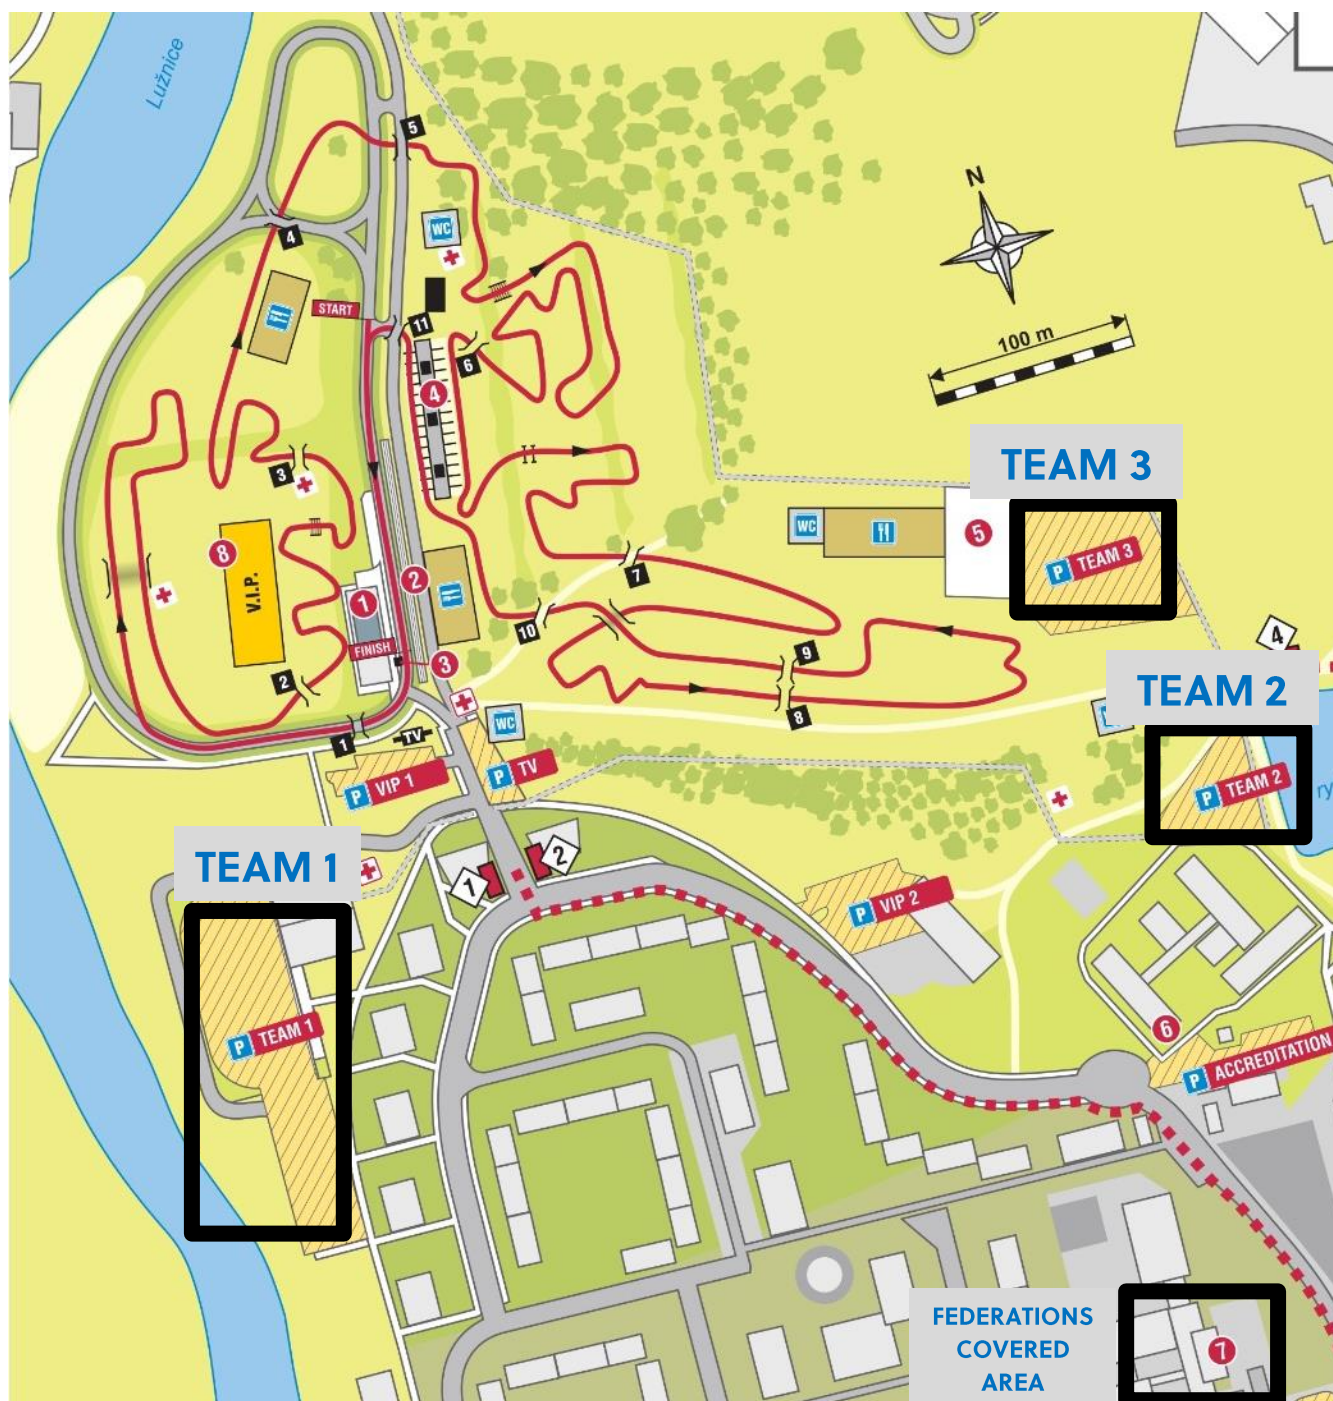

- 9.2.045 *ter A ranking by nations for the cyclo-cross world championships shall be drawn up by summing the points of the first three riders from each nation.*

The system for awarding points is based on the total number of rider starting in each category. If 100 riders start, the winner will score 100 points while the 100th placed rider would score 1. Should some starters not be given a finishing position, the last rider to be classified shall score the points for his position without taking account of the unclassified riders. Example: if 100 riders start and 80 riders are classified, the last of them will score 21 points.

Nations with three finishing riders shall be ranked first, then nations with two finishing riders and finally nations with one finishing rider. In case of equal points in this classification, the place of the best ranked rider will break the tie.

If one or more riders of one age category take place to the cyclo-cross team relay, then the nation will receive for that age category one bonus of points. The system for awarding points is based on twice the total number of nations starting in the cyclo-cross team relay. If 15 nations start, the winning nation will score 30 points while the 15th placed nation would score 2 points.
