

**It is critical that incidents involving occupants, patrons, and visitors on your premises be documented in an incident report form.** Doing so allows your business to investigate the cause of the incident and take corrective action to prevent such an incident from occurring again in the future. Notify your insurer of a possible claim and ensure you report the name and position of the person to whom you reported the claim.

This report form should be retained on file as long as necessary, usually a minimum of two years, to assist in defence against potential claims. Incident report forms should be organized and stored in an electronic database that is backed up at regular intervals.
