Make Your Own

FAIRY WINGS

1. Without cutting out the whole wing shape, cut out all the white areas from the center of the template.

2. Lay your shirt front side down on the flat surface, and insert the piece of cardboard.

3. Position the template page at the center back of the shirt, and tape down the corners.

4. Use your chalk to trace onto the shirt where you cut out the shapes.

5. Remove the template pieces. Cut out the shapes on the shirt.

6. Rock your new winged look! Try layering with a brighter color shirt underneath to make your wings really pop!
