What is the product?

Type: This Product is an investment company qualifying as UCITS Sub-fund in accordance with the UCITS law.

Term: This Product has no maturity date. The Sub-fund has been established for an indefinite period of time. The Board of Directors of the Investment Company is entitled to liquidate, merge or reposition the Product at any time unilaterally in case the Product can no longer be managed in the interest of the investors. The amount the investor will receive upon early termination may be less than the amount invested.

Objectives: This Index Tracker Sub-fund is passively managed aiming to create long term appreciation of capital, by tracking the Dow Jones Islamic Market US 5/10/40 Capped Index NTR (the "Benchmark"). The Index is designed to measure the performance of stocks domiciled in the U.S. that pass rules-based screens for adherence to Shariah Investment Guidelines. The portfolio and the performance of the Sub-fund can deviate from the index. The expected level of Tracking Error, in normal market conditions, is up to 0.3%. The Sub-fund will seek to replicate the performance of the Benchmark whilst minimising the Tracking Error between the Sub-fund's performance and that of the Benchmark, by following a full physical replication model. The Sub-fund intends to invest directly, in accordance with the Shariah Investment Guidelines and the Investment Restrictions, in all or substantially all of the underlying equity securities of the Benchmark. The investor can buy or sell shares of the Sub-fund on a daily basis (Luxembourg, United Kingdom and United States of America bank business days). This Share Class does not make distributions. The Sub-fund shall bear the costs of standard brokerage and bank charges incurred by the Sub-fund through securities transactions in relation to the portfolio.

Intended Retail Investor: This Product is intended for retail investors with sufficient knowledge and experience in collective investment schemes and similar products, an ability to bear an average investment loss, and a long-term investment horizon.

What are the risks and what could I get in return?

(A) Summary Risk Indicator

The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less.

The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. We have classified this Product as 4 out of 7, which is a medium risk class and poor market conditions could impact our capacity to pay you. **Be aware of currency risk** if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

(B) Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product / a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.
