

ORKIN® WAREHOUSE PEST CONTROL SERVICES

From protecting employees and goods, to ensuring the highest product quality standards, warehouse operations require countless moving parts. Orkin® knows a pest control plan comes with its own unique set of needs — that's why our warehouse pest control services are designed to help facility managers protect their products and operations from pests.

Warehouses provide an ideal habitat for pests due to:

- ◆ Multiple entry points
- ◆ Constant deliveries and shipments
- ◆ Transloading (transferring shipments between modes of transportation)
- ◆ Storage of goods in tight-fitting spaces
- ◆ Frequent opening and closing of shipping dock bay doors

Common Pests for Warehouses

Rodents

Cockroaches

Stored
Product Pests

Ants

Birds

Mosquitoes

A Customized Treatment Plan

With Orkin, you can trust that your custom, ongoing treatment plan with proactive pest control techniques will handle pests so you can focus on your business. Orkin's Logistics and Food Safety Precision Protection® programs use our Integrated Pest Management (IPM) approach to address warehousing facilities' unique pest control needs. We use our A.I.M.® process (Assess, Implement, Monitor) for a better way to help keep pests out.
