

ORKIN[®] RODENT CONTROL

Rodents can damage your property, goods and reputation. And no two rodent problems are alike. That's why Orkin[®] customizes your rodent control plan to your business and facility — to address the problem at every level.

Rodents Can:

Tarnish Your Reputation. A rodent sighting can create an unhygienic perception of your business and potentially drive away customers.

Reproduce Rapidly. Most rats and mice can produce multiple litters in a year, causing a problem that literally multiplies quickly.

Damage Property. Rodents can chew through almost anything, making them capable of destroying stored goods and wiring, and causing structural damage.

Spread Diseases. Rodents are known to directly and indirectly transmit over 200 pathogens, 35 diseases and trigger allergies.

Shape Shift. Rodents can squeeze through openings only as big as their heads — mice can fit through holes the size of a dime and rats the size of a quarter.

Contaminate. Rodents can produce a significant amount of waste, that can spread those diseases everywhere they explore.

Rodent Control Service

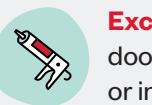

Using our Integrated Pest Management (IPM) approach, your Orkin Pro[™] will conduct a comprehensive inspection of your facility and develop a rodent control plan to suit your property's specific needs.

Inspection. Evaluation of your property for any signs of rodent attractants, activity and potential entry points.

Trapping and Removal. If rodents are present, your Orkin Pro may place traps and other control methods around your facility and will remove rodents to help prevent a re-infestation and the potential spread of diseases.

Exclusion. Your Orkin Pro may install door sweeps, caulk cracks and holes, or install metal mesh on vents to help block off openings that could be entry points into your facility.

Rodent Repellent Program. An all-natural, exterior solution that helps keep rodents out for up to 60 days. Made with essential oils containing scents and tastes that rodents hate. Your Orkin Pro may use it alongside other rodent control methods.

Sanitation. Your Orkin Pro will create a detailed sanitation plan for your facility to help reduce rodent attractants.

Ongoing Monitoring and Maintenance. With a proactive approach, your Orkin Pro will conduct ongoing inspections and adjust your plan as needed to help ensure your plan is as effective as possible.

Ready to have absolute confidence in your pest control?

Contact Orkin to partner with the gold standard in pest control.
