

DISINFECT YOUR BUSINESS TODAY

It's a new era of sanitation, and your customers and employees have high expectations when it comes to preventive health and safety measures. As a leader, you know that keeping your team operating at its best means not only ensuring they *are* safe—it means helping them *feel* their safest, too.

You care about your team's well-being, and during cold and flu season, you want to avoid the disruptions of having multiple team members out sick. Implementing measures that help mitigate the transmission of bacteria and viruses will help keep operations running smoothly while demonstrating your commitment to the health of your employees and customers.

Let us take managing heightened workplace sanitation off your to-do list with Orkin[®] VitalClean[®].

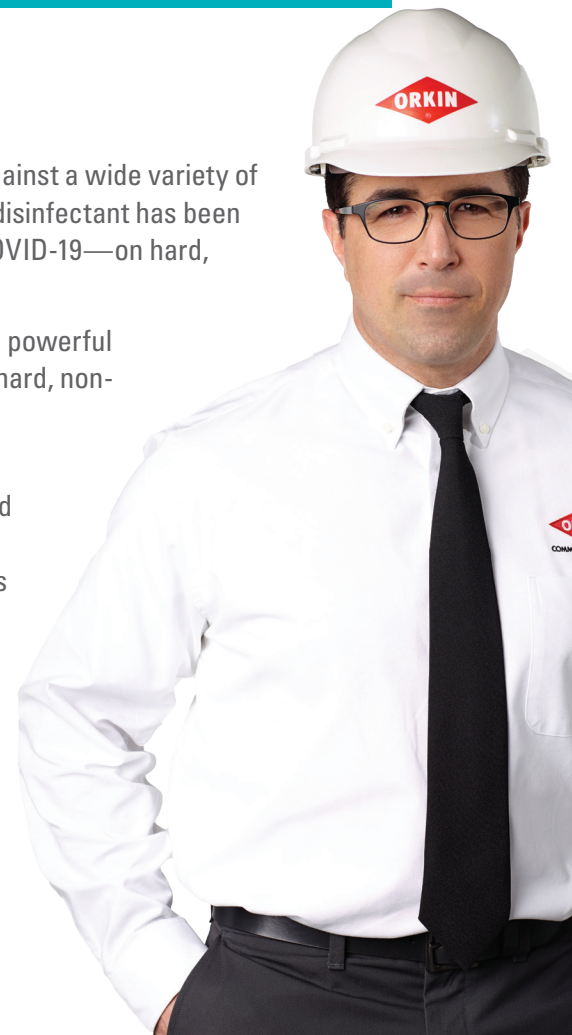

DISINFECTION YOU CAN TRUST

You can feel confident in your decision when you choose VitalClean—backed by the same level of reliability and performance you know and trust from Orkin. And, our technicians are highly trained to minimize business disruptions and deliver the gold standard in customer service.

A Proven Disinfectant

- Orkin VitalClean uses an EPA-registered disinfectant labeled for use against a wide variety of pathogens, including viruses that cause the flu and common cold. The disinfectant has been tested and proven to kill SARS-CoV-2—the coronavirus that causes COVID-19—on hard, non-porous surfaces.
- When applied at full strength in accordance with the product label, this powerful disinfectant will kill 100% of bacteria and viruses listed on the label on hard, non-porous surfaces and will also sanitize soft, porous surfaces.

Orkin has been using this same product for years to sanitize residential and commercial locations after certain pest services, as well as wildlife and bird exclusion. Despite its remarkable strength to disinfect hard surfaces and sanitize soft surfaces, this product has minimal environmental impact and is mild on skin, hard surfaces and fabrics.

Minimal Environmental Impact

- The disinfectant product we use is rated by the EPA as Toxicity Category IV, their lowest toxicity rating, defined as “practically non-toxic and not an irritant.”
- It contains no ozone-harming volatile organic compounds (VOCs), and is mild on skin, hard surfaces and fabrics.
- For foodservice facilities, it is rated “no rinse required on food contact surfaces” category D2 by NSF International. This means it is approved for use in commercial or residential kitchens to control bacteria, viruses and mold without the need to wash/rinse the area with water after application.

How It Works

Our trained technicians carefully wipe down all high-touch surfaces, apply a misting application using specialized equipment and let it dry undisturbed for 10 minutes.

For maximum impact, you should prepare for the treatment by cleaning the target zones to remove dust and dirt, and remove or store any paper, exposed food or other items that might be damaged from contact with a liquid mist.

GET THE CONFIDENCE OF A DEEPER CLEAN

Orkin® VitalClean® helps you maintain business as usual during cold and flu season by helping protect your employees and customers from illnesses caused by viruses and bacteria. When it comes to helping your employees and customers feel confident in your health and safety measures, trust the national leader in pest control.
