

ORKIN® HEALTHCARE PRECISION PROTECTION®

You work daily to have a healthcare environment that exceeds safety regulations and patient expectations. Finding a pest control provider that can say the same shouldn't be hard.

That's why we created our Healthcare Precision Protection® program. With protocols crafted to comply with your industry's — and even your facility's — unique needs, you can stop worrying about your pest control and let the most trusted name in the industry take care of business.

A Customized Treatment Plan

Like healthcare, our Integrated Pest Management (IPM) approach starts with diagnostics. Healthcare Precision Protection programs use our A.I.M.® process for a better way to help keep pests out:

ASSESS

We inspect and identify the cause of existing pest activity in your facility and evaluate your property for conditions conducive to pest activity.

IMPLEMENT

We develop a custom, ongoing plan with proactive pest control techniques, personalized tips and effective treatment options.

MONITOR

We'll monitor your facility for ongoing protection, document all services performed and pest activity observed after every visit, and recommend program adjustments to maintain efficacy as needed.

Add Orkin Gold Medal QA® to Your Program

Healthcare Precision Protection customers can meet healthcare pest control requirements with this comprehensive package. It includes an additional layer of quality assurance and documentation to help you meet — and even exceed — The Joint Commission requirements. Additional protocols include:

- ◆ Annual audits by Rollins' Quality Assurance Team
- ◆ Vendor Inspection Program (VIP)
- ◆ Free staff training on common pests for healthcare environments, including bed bugs

Other Orkin Services

Orkin offers additional services that may be useful to your facility. Ask your Orkin Pro™ for more information.

- ◆ **Actizyme® Floor and Drain Cleaner**
For small flies

- ◆ **Bed Bug Control**

- ◆ **Bird Control**

ORKIN
InSite®

Orkin InSite®

You keep dedicated patient records — we've got you covered with detailed pest records.

You can find real-time reporting and monitoring documentation on our Orkin InSite® dashboard 24/7.
