

# ORKIN<sup>®</sup> DRAIN CARE

## WITH ORKIN ACTIZYME<sup>®</sup>

Drains are often small, but can create big problems for your business. Grease and grime buildup attract pests, create odor-causing bacteria and can cause unsanitary workplace environments.

That's why Orkin<sup>®</sup> offers Drain Care with Orkin Actizyme<sup>®</sup> — an environmentally responsible solution that uses naturally occurring enzymes and beneficial bacteria to break down organic matter.

### Orkin Actizyme:

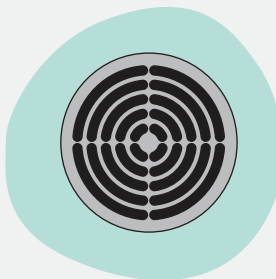

- ✓ Helps dissolve grease and grime build up in hard-to-reach areas.
- ✓ Helps control odor-causing bacteria, not just mask it.
- ✓ Helps prevent grease buildup, leaving you with a more sanitary workplace.

### Your customized Drain Care program can include:

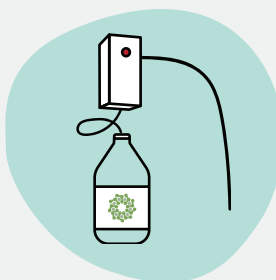

#### Multi-Purpose Cleaner.

Orkin Actizyme can be used in drains as a multi-purpose cleaner, at varying levels of strength, to help break down tough residues.

**Floor Drain Trap Seal.** Your Orkin Pro<sup>™</sup> can install an in-drain valve that allows water to flow through, but helps reduce gases and insects from getting in through drains.

**Dosing System.** Your Orkin Pro can install a wall-mounted dispenser that automatically dilutes the Orkin Actizyme concentrate and dispenses it directly into drains and pipes.

**Address Drain Issues Before They Surface**

**Contact Orkin to schedule your free inspection.**
