

ORKIN ECLIPSE™ MOSQUITO SERVICE

Mosquitoes are a nuisance and can transmit harmful diseases. Taking a proactive approach is the best way to control their population. While traditional mosquito treatments help control all mosquito species, they do not always maintain efficacy and do not target all life stages continually. And for some businesses, certain pesticide treatments are not always an option. Your solution? The Orkin Eclipse™ service.

Orkin Eclipse

- ◆ Environmentally conscious traps made of recycled materials and fungal-based larvicides to target certain mosquitoes. Ask your Orkin® representative for more details.
- ◆ Spreads treatment to other breeding areas through the mosquitoes themselves, helping to reduce overall populations.
- ◆ Your Orkin Pro™ will professionally service traps monthly, and it remains effective after rain.
- ◆ A discreet solution with the ability to blend traps into shrubs and flower areas.

Orkin's IPM Approach:

Inspection. Evaluation of your property for any potential mosquito breeding sites.

Treatment. Recommended treatment is applied and, if applicable, recommended equipment is installed to help reduce and prevent mosquitoes.

Consultation. Provide you with a customized mosquito control program.

Monitoring. Ongoing inspections for your property to ensure your program is the most effective.

Ready to have absolute confidence in your pest control?

Contact Orkin® to partner with the gold standard in pest control.
