

Cancer Nurse Navigators

Cancer is not a diagnosis you should face alone. Cancer nurse navigators at Hoag Family Cancer Institute serve an important role as a healthcare advocate to help guide patients with answering questions and providing support through each phase of diagnosis, treatment, and into survivorship.

Patient Testimonials

“My nurse navigator was very instrumental in my cancer treatment and in my cancer journey here at Hoag. She was part of a team that helped save my life. If I didn’t have a nurse navigator’s help, I couldn’t imagine going through what I did.”

SCOTT, PATIENT

“I’d highly recommend that any cancer patient reach out to a nurse navigator... it was very comforting to know that my navigator was there to talk to about things, including extensive education about treatment options and planning with my physician.”

JACK, PATIENT

“Having a nurse navigator gave me such a feeling of confidence because I knew that I didn’t have to walk through anything alone. Having somebody there that knows exactly where to point you and tell you what to do is such a relief. It is such a good feeling on the inside to know that somebody is in your corner that knows what’s going on. I can’t say enough good things about her.”

JANET, PATIENT

To connect with a nurse navigator, please call (949) 7-CANCER (722-6237).
