- The Payscale.com database is dated January 1, 2024.
- Hourly rates are computed by using 2,080 hours.
- Salaries presented represent the median, or 50th percentile. That means that 50% of the population pays above this number, and 50% of the population pays below this amount.
- The database from Payscale.com, which works with human resources and compensation specialists to modernize compensation and salary benchmarking through technology, was developed based on more than 2,000 commercially available, reputable compensation surveys. Each survey complies with generally accepted principles and practices of WorldatWork and U.S. Department of Justice compensation survey standards. The database covers all 50 states and the District of Columbia.
