

Sanibel Harbour Marriott Resort & Spa Hurricane Charley Reconstruction

Fort Myers, Florida

Client:
The Gettys Group

Total Cost:
\$10,000,000

Nature of Work:

The project scope of work consisted of renovations to an 85 acre resort located on Sanibel Island due to extensive damage caused by Hurricane Charley. Although the resort fared well structurally, many of the public spaces and guest rooms in the 240-room seaside hotel and the 107-room historic Grand Bay Inn were water and wind damaged.

The newly renovated hotel and inn exhibit an inviting decor, inspired by the natural beauty of the seaside setting. The vistas of warm sand tones, antique furnishings, elegantly appointed baths and soft botanical accents are thematically the new ambiance at the resort.

Similarly, the resort's two sparkling pools, four restaurants and retail spaces were also renovated and have re-opened under new themes, surrounding the resort's guests with all the comforts of home and contributing to the resort's current four diamond rating.
