

Orlando Tennis Center

Orlando, Florida

Client:
City of Orlando

Total Cost:
\$5,500,000

Nature of Work:

Borrelli + Partners was selected, as part of a team with H.J. High Construction, for the design-build of the new Orlando Tennis Center. The complex will be one of the inaugural facilities constructed in College Park's Packing District.

The City of Orlando project will include 16 lighted tennis courts, both hard court and clay, a modern clubhouse, an observation deck, a variety of amenities, and an abundance of eco-friendly design features.

The existing Orlando Tennis Center facility is located on Livingston Street, and will be demolished to make way for the development of the Downtown Orlando Creative Village. The new Orlando Tennis Center facility will maintain a community-focus and offer a variety of special events, along with group and private instruction.
