

**Ocala International Airport
General Aviation Terminal
Building**
Ocala, Florida

Client:
City of Ocala, FL

Total Cost:
\$6,178,015

Nature of Work:

As part of a Design/Build team, B+P provided architectural design services through construction administration for Ocala International Airport's new General Aviation Terminal Building.

The goal of the project is to provide the City a building for various uses including: airport administration, airport fixed base operations, restaurant, multiple car rental business, meeting rooms, rental space for commercial aeronautical business and possible future expansion to facilitate US Customs Service.

The property will enhance aviation services to make the airport more useful to general aviation users, corporate aviation users and the business community.

The architectural and engineering work is being developed using the 30% Design Criteria Package plus any updates since the release of the RFP by the City of Ocala.
