

University of North Florida
Aquatic Complex
Jacksonville, Florida

Client:
University of North Florida

Total Cost:
\$9,500,000

Nature of Work:

Borrelli + Partners, Inc. was selected to develop the University of North Florida's new Aquatic Complex. Located behind the Student Wellness Complex, the new Aquatic Complex is home to swimmers in UNF's NCAA Division I Women's Swimming program.

The facility features a new, Olympic-size, 50-meter x 25-yard competition pool. Sized with 9 lanes in the long course direction and 20 lanes in the short course direction, the pool is designed to host a multitude of student aquatic activities, from swim competitions and training to water polo matches and more. The project also includes new facilities for locker rooms, athletic offices, and support facilities for the pool, totaling approximately 7,600 square feet. The pool and facilities were designed sustainably and includes Natural Gas heating and low water usage backwash.
