

Miami Beach Judicial Center Parking Garage

Miami Beach, Florida

Client:
City of Miami Beach

Total Cost:
\$4,600,000

Nature of Work:

Project elements included the design of two separate parking garages to accommodate the needs of the City's Police Department, the Municipal Courts and tenants/visitors for the adjacent restored "Old City Hall" building, totaling 50 cars.

Provisions were made in the foundations, the structure and vertical circulation systems of the smaller of the two garages accommodating 150 cars, for the future addition of an additional three levels of garage decks and an office tower, to be developed and constructed over the original garage's air-rights.
