1. & 4. TEXTILE PACKAGING FOR MAISON MATINEE, Perfume bottle insert made from recycled textiles for Maison Matinee's Night Fever collection from the recycling of laundry waste **2. MANUFACTURE DE PORCELAIN DE SÈVRE (PARIS)** A wooden transport case for porcelain objects, with Pierreplume inserts. Its purpose is to allow patients to discover the manufacturing process through smell, hearing, sight, and touch. All the pieces, including valuable porcelain objects, are presented in their protective and elegant Pierreplume cases. **3. JEWELRY BOX**, application example.

We create materials out of recycled textile

pierreplume® creates refined materials made from recycled textile fibers for design, packaging, and architecture. All our materials are crafted in France using carefully selected recycled fibers.

We develop soft, semi-rigid, and rigid felt solutions designed to protect and enhance fragile and precious objects. Our materials support designers and brands in creating responsible, high-end projects, while revealing the unique aesthetic qualities of recycled textile fibers.

Available in small and medium production runs, our materials can be fully customized to meet specific requirements in terms of density, thickness, and color palette.
