

Managing Your Bitwarden Vault

Bitwarden Essential Series

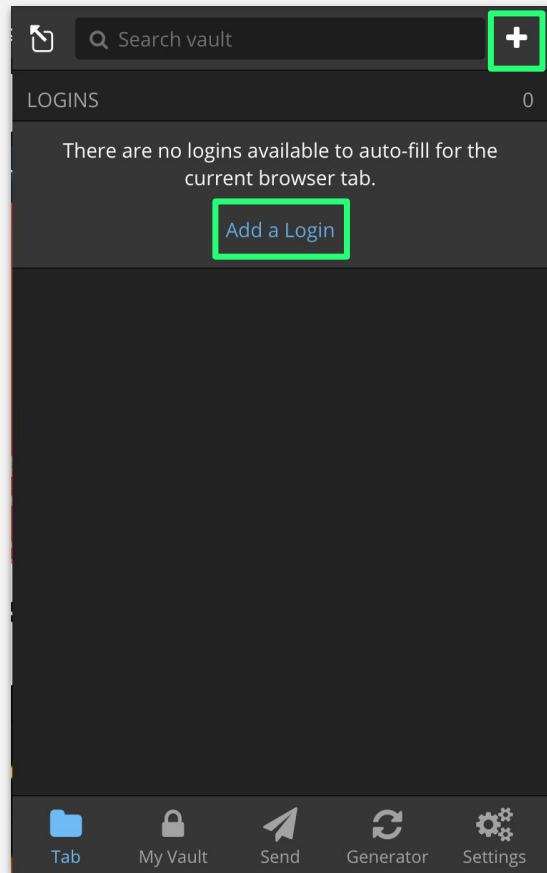

Vault Items

- There are 4 types of items you can store in a Vault:
 - Login
 - Card
 - Identity
 - Secure Note
- Folder for your Personal Vault
- Assigned Collections
- Trash
 - 30 days

Adding Items

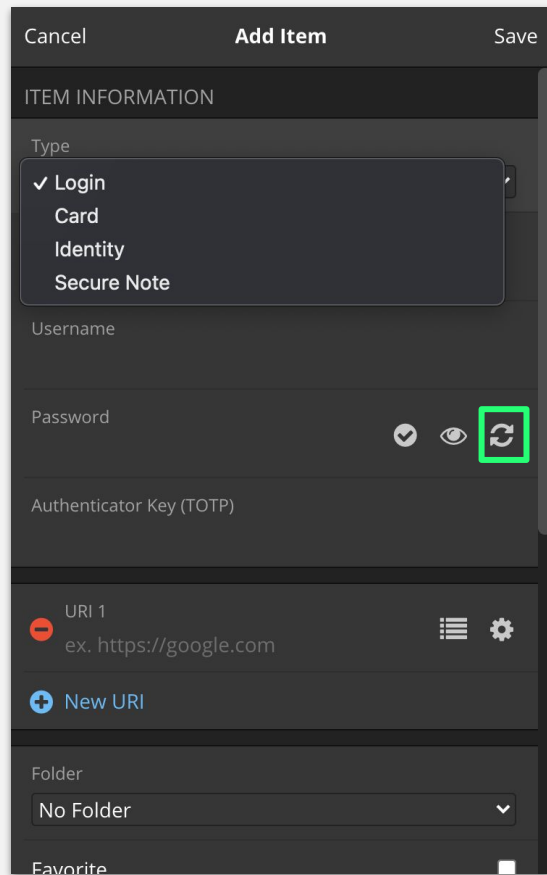

- Manually - using the **+** sign or **Add a Login** from within your vault.
- Automatically (via the Browser Extension)
 - when logging into a website for the first time; or when changing credentials for a website.

Adding Items

If you add a new item directly with Bitwarden, you will have the following options:

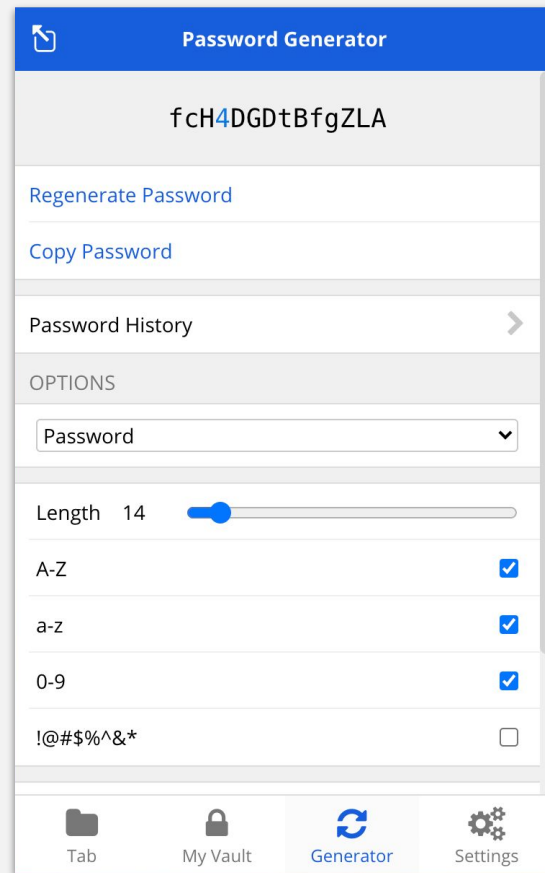

- Select the type
- Name
- Username
- Password
- URL
- Add it to to a specific folder
- Add additional notes
- Ownership

The screenshot shows the 'Add Item' screen in the Bitwarden app. At the top, there are buttons for 'Cancel', 'Add Item', and 'Save'. Below this is the 'ITEM INFORMATION' section. The 'Type' dropdown menu is open, displaying four options: 'Login' (which is selected with a checkmark), 'Card', 'Identity', and 'Secure Note'. Below the type selection, there are input fields for 'Username', 'Password', and 'Authenticator Key (TOTP)'. The 'Password' field has three icons on its right: a checkmark, an eye icon, and a refresh icon (a circular arrow). The refresh icon is highlighted with a green square. Below the password field is a section for 'URI 1' with a red circle icon, showing an example 'ex. https://google.com' and icons for a list and settings. There is also a '+ New URI' button. At the bottom, there is a 'Folder' dropdown menu currently set to 'No Folder' and a 'Favorite' toggle switch.

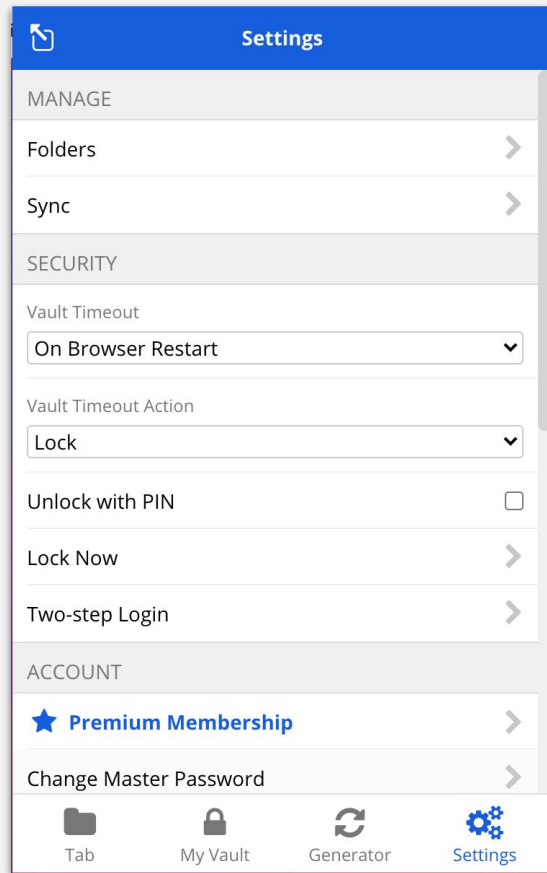

Password Generator

- Bitwarden can generate passwords for you that are:
 - Long
 - Complex
 - Random
 - Unique per login

Vault Settings

- Manage your Folders and Sync
- Additional Security Features:
 - Vault Timeout
 - Vault Timeout Action
 - Lock
 - Log Out

Family Organizations, Users, and Collections

Family Org Vault

Collections

→ Logins, Secure Notes,...

Collection 1

Collection 2

Collection 3

Shared items are placed into a Collection that can be assigned to one or more members.

Individual Vault

Folders

→ Logins, Secure Notes,...

Family Users

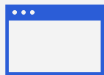

Each Family Organization can have up to 6 members.

All Vault data end-to-end encrypted with zero knowledge

Bitwarden Clients

Mobile

Browser

Desktop

CLI

Web Vault
