Live Surgeries
Interactive Discussions
Hands-on Lab

Which Approach is Best?

Objectives

Utilizing a combination of interactive discussion, observation of live surgery and immediate full arch fixed conversions, hands-on exercises, and lecture materials, this comprehensive two-day course demonstrates an effective team approach. To help both your patients, and your practice.

Treating your patients

- Patient Selection
- Diagnosis and case work up
- Interpretation of CAT scans
- The role of digital technologies
- Selection of the appropriate therapeutic approach
- Implant selection criteria
- Minimize chair time and optimize surgical and restorative efficiency
- Simplify fabrication of the final prosthesis

Faculty:

Paul A. Fugazzotto D.D.S

Ira & Brandon Dickerman of Dickerman Dental
Prosthetics

Treating your practice

- Effective internal marketing
- Identifying and attracting new full arch cases
- The role of the hygienists in patient identification and referrals
- Effective consultations to ensure case acceptance
- Global fee structuring
- Innovative third-party financing to close cases
