## Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' that is endorsed in the Kingdom of Saudi Arabia. A review of condensed consolidated interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that are endorsed in the Kingdom of Saudi Arabia, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

	<b>Unaudited</b>	Audited
Shopping malls on owned lands	<b>11,892,810,941</b>	11,929,917,260

viii. Fair value of investment properties

a) *Fair value hierarchy*

The fair value measurement for investment property of SR 24,875 million (31 December 2023: SR 24,637 million) has been categorized as a level 3 fair value based on the significant unobservable inputs adopted by the valuer in the valuation technique used which are future retail rental payment terms; discount rates; capitalization rate (yields); forecasted occupancy; and cost to complete projects.

The fair value of investment properties as at the reporting dates for all properties, whether owned or leased, is determined by independent external valuers with appropriate qualifications and experience in the valuation of properties. Effective dates of the valuations are 31 December 2023 and 31 March 2024 and are prepared in accordance with Royal Institution of Chartered Surveyors (“RICS”) Global Standards 2020 which comply with the international valuation standards and the RICS Professional Standards. The valuations have been performed by Colliers Saudi Arabia, ValuStart and NATA Real Estate Appraisal Company. As per the CMA regulations for annual reporting, the Group has opted for the lower of the two valuations for the properties performed by the independent and competent valuers.

b) *Inter-relationship between key unobservable inputs and fair value measurement*

**31 March 2024**

Property	Fair value SR million	Valuation technique	Significant unobservable input	Range
Shopping Malls	18,318	Discounted cash flows	Occupancy (%)	66% - 100%
			Future rent growth (%)	2%-5%
			Discount rate (%)	10% - 21%
Properties under construction	6,218	Discounted cash flows	Occupancy (%)	90%-95%
			Future rent growth (%)	2%
			Discount rate (%)	12% - 16%
Owned land	339	Comparable transaction	Average price (SR /sqm)	210 – 8,375

The estimated fair value would increase/(decrease) if the discount rates were lower/(higher) and/or the growth rates and occupancy% were higher/(lower).

**B. Financial risk management**

The Group has exposure to the following risk arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk (including commission rate risk, real estate risk and currency risk)
- Capital management risk

The Group's principal financial liabilities are loans and borrowings. The main purpose of the Group's loans and borrowings is to finance the acquisition and development of the Group's investment properties portfolio. The Group has accounts receivable, amounts due to and from related parties, lease liability, accounts payable and cash and bank balances that arise directly from its operations.

**i. Credit risk**

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risks from its leasing activities, including deposits with banks and financial institutions.

Credit risk is managed by requiring tenants to pay rentals in advance. The credit quality of the tenant is assessed based on an extensive credit rating scorecard at the time of entering into a lease agreement. Outstanding tenants' receivables are regularly monitored. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial asset.

Bank balances and deposits are held with local banks with sound external credit ratings.

Accounts Receivable

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and sector in which customers operate.

Each entity within the group has established a credit policy under which each new customer is analyzed individually for creditworthiness before the entity's standard payment and delivery terms and conditions are offered. The review includes financial statements, industry information and in some cases bank references. Credits to each customer are reviewed periodically. The Group limits its exposure to credit risk by offering credit terms which are typically not longer than three months on average.

**C. Financial risk management (continued)**

**i. Credit risk (continued)**

In monitoring customer credit risk, customers are grouped according to their credit characteristics trading history with the Group and existence of previous financial difficulties.

Loss rates are based on actual historic credit loss experience. These rates are multiplied by scalar factors to reflect differences between economic conditions during the year over which the historic data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables. Scalar factors are based on actual and forecast gross domestic product growth.

The following table provides information about the exposure to credit risk and ECLs for accounts receivable from customers after adjusting with Loss given Default (LGD) ratio as at 31 March 2024 and 31 December 2023.

###### Accounts Receivable (continued)

During the three-month period ended 31 March 2024, the Group has written off receivables amounting to **SAR 3.7 million** (31 March 2023: Nil million). In addition, the group has directly charged to profit or loss an amount of **SR 27.1 million** (31 March 2023: SR 39.5 million) on account of impairment of accrued revenue.

###### Due from related parties

An impairment analysis is performed at each reporting date on an individual basis for the major related parties. The maximum exposure to credit risk at the reporting date is the carrying value of the amounts due from related parties. The Group does not hold collateral as a security. The Group evaluates the risk with respect to due from related parties as low, as majority of the related parties are owned by the same shareholders. The evaluation is based on actual historical credit loss history, and the ongoing support from Shareholder to collection activities, with retentions on dividend pay-out of SAR 180 million in 2023. Expected credit losses on receivables from related parties have been assessed and resulting impairment loss of SR 44.4 million has been recognised in respect of these receivables.

###### Financial instruments and cash deposit

Credit risk from balances with banks and financial institutions is managed by Company's treasury in accordance with the Group's policy. Cash is substantially placed with national banks with sound credit ratings ranging BBB+ and above or in money market instruments from reputable managers associated with leading domestic banks. The Group does not consider itself exposed to a concentration of credit risk with respect to banks due to their strong financial background.

##### ii. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The management believes that the Group is not exposed to significant risks in relation to liquidity and maintains different lines of credit. Upon careful comparison of the financial liabilities included within the current liabilities (excluding amounts due to related parties as these could be deferred during liquidity crunch situation) with the financial assets forming part of the current assets, there seems to be a reasonably hedging position between the two categories.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments:

Contractual maturities of financial liabilities:	Carrying amount	Less than 6 months	Between 6 and 12 months	Between 1 and 2 years	Between 2 and 5 years	Over 5 years	Total

**iii. Market risk**

Market risk is the risk that changes in market prices, such as currency rates and interest rates that will affect the Group's profit or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Commission rate risk

Commission rate risk is the risk that the value of financial instruments will fluctuate due to changes in the market commission rates. The Group has no significant commission bearing long-term assets, but has commission bearing liabilities at 31 March 2024 and 31 December 2023. The Group manages its exposure to commission rate risk by continuously monitoring movements in commission rates.

The following table demonstrates the sensitivity of the Group to a reasonably possible change, with all other variables held constant, of the Groups profit before zakat (through the impact on floating rate borrowings):

<b>Gain/(loss) through the condensed consolidated statement of profit or loss</b>	<b>Three-month period ended 31 March 2024</b>	<b>Three-month period ended 31 March 2023</b>

SIBOR -100bps	<b>9,694,375</b>	<b>8,666,053</b>

Real estate risk

The Group has identified the following risks associated with the real estate portfolio:

- The cost of the development projects may increase if there are delays in the planning process. The Group uses advisors who are experts in the specific planning requirements in the project's location in order to reduce the risks that may arise in the planning process.
- A major tenant may become insolvent causing a significant loss of rental income and a reduction in the value of the associated property. To reduce this risk, the Group reviews the financial status of all prospective tenants and decides on the appropriate level of security required via rental deposits or guarantees.

Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises from recognized assets and liabilities which are denominated in currency that is not Group's functional currency. The Group has certain US Dollar denominated financial liabilities which are not exposed to significant currency risk as Group's functional currency is pegged to US Dollar.

**iv. Capital management risk**

The Board's policy is to maintain an efficient capital base as to maintain investor, creditor and market confidence and to sustain future development of its business. The Board of Directors monitor the return on capital employed and the level of dividends to ordinary shareholders.

The Group's objectives when managing capital are:

- i) to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and
- ii) to provide an adequate return to shareholders

The Group monitors capital using a ratio of 'net debt' to 'equity'. Net debt is calculated as total liabilities less cash and cash equivalents and short-term investments held for trading. The Group's net debt to equity ratio at 31 March 2024 was as follows.
