

QUALITY AND RESPONSIBILITY APPENDIX FRESH FRUITS AND VEGETABLES

Parties

General Requirements

1 General

With respect to production and products, the Supplier shall observe the following Buyer's general requirements for Suppliers and products. The Supplier is responsible for ensuring that the products and the production and the products' placing on the market meet the requirements of the European Union/European Economic Area and the Finnish legislation. The Supplier is liable for the performances of the supply chain and all of its sub-suppliers and for the compliance of such performances with this agreement as for its own performance.

2 Product Information

At the Buyer's request, the Supplier shall provide the Buyer's representative with any information reasonably required by such representative on the Buyer's product due to this agreement. Unless otherwise agreed, the Supplier is responsible for all environmental and quality registrations and registrations of origin as well as other corresponding registration and notification procedures with the authorities and other relevant parties for the products under the Supplier's brand.

3 Product Safety, Quality and Quality Standards

The Suppliers must ensure the safety of their products and compliance with the requirements of European Union/the European Economic Area and Finnish legislation. The Supplier is responsible for the performance of all its subcontractors as for its own performance.

The quality of the vegetables shall correspond to the Buyer's requirements and comply with the product-specific trade norms based on the common organisation of the market in fruit and vegetables. In other cases, the products shall meet the standards of the FAO/WHO, Codex Alimentarius or OECD.

The mode of operation set out in the HACCP principles shall be observed in the production and packaging of food (the HACCP-Codex Alimentarius Principles).

The GAP principles (Good Agricultural Practice, GLOBALGAP, the Finnish *Laatutarhaohjeistus* guidelines), the IP principles (Integrated Production) or other similar principles shall be observed in the cultivation and production of vegetables.

Internationally recognised and approved product safety and quality certifications include, e.g.- the following:

- BRC (British Retail Consortium)
- GRMS (Global Red Meat Standard)
- IFS Food Standard
- SQF 2000 Code (Safe Quality Foods)
- FSSC 22000 (Food Safety System Certification)
- The ISO 22000 or ISO 9001/2000 standards for quality management systems
- PAS 220 (Publicly Available Specification)

At the Buyer's request, the Supplier shall deliver documentation relating to product safety and quality assurance.

In the event the Buyer or the authorities notice deviations in the quality of the products, the Buyer may request the Supplier to order additional analyses from an accredited laboratory.

4 Environmental Responsibility

In its operations the S Group promotes the principles of UN's sustainable development and the S Group is in its own operations committed to mitigate the effects on climate and biodiversity. The Buyer encourages also suppliers to take them into account in their own operations.

The Supplier shall take adequate precautions to assess its environmental impacts and risks, and to prevent, minimise and remedy negative impacts. The Supplier shall have procedures for identifying environmental requirements and shall identify environmental impacts of its operations and make proactive efforts to reduce emissions into the atmosphere, soil and water as well as to utilise resources efficiently.

The Supplier shall identify the relevant environmental legislation applicable to its operations, act in accordance with it and be able to present evidence of conformity as required by such legislation. The Supplier shall have an environmental management system that takes account the model for continuous improvement and describes the procedures for the treatment of waste, chemicals, emissions and sewage. The environmental management system must comply with the requirements of ISO 14001 or the EU Eco-Management and Audit Scheme (EMAS). The Buyer is entitled to perform an auditing or inspection visit to verify the aspects of environmental responsibility.

The Supplier is expected to measure the greenhouse gas emissions of its operations. The S Group encourages suppliers to set targets for the reduction of greenhouse gas emissions, for example in accordance with the Science Based Targets Initiative.

The Supplier is encouraged to give priority to the use of renewable materials, raw materials and energy sources, as well as to utilise circular economy operating models in which recyclability and reusability are carried out as well as possible.

Unnecessary packaging is avoided when packaging products. The Suppliers are recommended to use recyclable packages that are labelled with appropriate markings to facilitate recycling. The use of PVC plastic or oxo-degradable plastic shall not be accepted in products or packaging. It is forbidden to use bleaching methods based on elemental chlorine for the bleaching of materials used for packaging.

5 Social Responsibility and Human Rights

In its operations and in the procurement of products and services, the S Group is committed to social responsibility and to respect all internationally recognised human rights. In its human rights principles, the S Group is committed in accordance with the UN Guiding Principles on Business and Human Rights (UNGP) to diligently identify, prevent, minimise and address human rights risks, as well as to a transparent mode of operation, and expects the same from its partners.

In its operations and supply chains, the Supplier shall undertake to respect all internationally recognised human rights, the International Labour Organisation ILO's Minimum Standards for Working Life, the principles of the UN Declaration of Human Rights and the Convention on the Rights of the Child, and the laws and collective agreements of the target country.

In addition, the S Group is committed to the international social responsibility system amfori BSCI's (Business Social Compliance Initiative) Code of Conduct and to promote its principles in its operations and in all its procurement. The Supplier undertakes to get acquainted with amfori BSCI's Code of Conduct as in force from time to time and the content and requirements of its appendices which are available at <https://s-ryhma.fi/en/for-suppliers/chain-supplier>. These documents form an integral part of this agreement.

By signing this agreement, the Supplier undertakes to comply with the amfori BSCI's Code of Conduct and its appendices as in force from time to time. In its operations and supply chain, the Supplier undertakes to comply with and to promote the following principles based on the principles of BSCI:

- Employees are entitled to form associations and be members of a trade union.
- Employees must be treated equally. Foreign employees employed in Finland work with such wage and working conditions that are not worse than general conditions prevailing in the Finnish labour market.

- Employees must be paid salary of an amount at least at the level required by law and overtime work must be compensated with overtime compensation, at least in accordance with national legislation.
- Employees must be provided a safe working environment and harassment must not be allowed.
- The minimum working age cannot be lower than required by national legislation and the provisions of the ILO Minimum Age Convention (ILO 138).
- The employment relationship must be voluntary, employees cannot be required to provide collateral, a payment for employment agency services or any other securities in exchange for the employment relationship. Employees must have the liberty to leave the workplace at the end of their work shift.
- Employees shall have valid work permits.
- All employees shall have been informed of the general terms and conditions of employment before they begin their work.

Compliance with social responsibility requirements

The Supplier shall have procedures in accordance with the UN Guiding Principles on Business and Human Rights (UNGP) to identify, reduce and remedy human rights risks. Such procedures shall include processes to identify, minimise, prevent and remedy detrimental human rights impacts, both in the company's own operations and in the supply chain of the products and services, including potential sub-suppliers and procurement of raw material. The Supplier must have a confidential channel in accordance with the UNGP to which employees can anonymously report labour and human rights violations, abuses and corruption.

The Supplier shall inform employees about the S Group's anonymous reporting channel <https://report.whistleb.com/fi/sgroup>, where also employees working in supply chains can report violations of labour and human rights.

The Supplier shall put the expectations into practice with its suppliers, who produce raw materials or components for the products to be delivered to the Buyer and monitor their implementation in the supply chains. In supply chains where the Supplier does not have a direct business link to all stages of the supply chain and where human rights risks have been identified, the Buyer expects the Supplier to strive for continuous improvement and to increase its possibilities to influence, in order to minimise the identified risks.

Upon request, the Supplier shall demonstrate how it complies with the requirements set out in this agreement in its operations and supply chains. The Supplier undertakes that the Buyer's representative or a person authorised by it, has access to the production facilities and relevant documentation to assess conformity with the requirements.

In the event of emergence of defects of working conditions in the supply chains of products or services delivered to the Buyer, the Supplier must investigate and remedy any such defects as well as report the revealed deficiencies and corrective measures to the Buyer.

Auditing the social responsibility

For Suppliers whose production or whose sub-suppliers' production is located in a risk country, or who import or market products manufactured in risk countries, the Buyer requires that the production facility located in a risk country has a valid Amfori BSCI audit or that an equivalent social responsibility audit process, accepted by the Buyer, has been carried out by a third party. Otherwise, BSCI or an equivalent audit shall be arranged immediately upon the commencement of the cooperation. The Supplier is responsible for all costs related to the audit. Upon request, the Supplier shall provide the Buyer with a copy of the certificate or the audit report.

The social responsibility audits carried out by third parties approved by the Buyer are:

- Amfori BSCI (Business Social Compliance Initiative)
- SA 8000
- SMETA (Sedex Members Ethical Trading Audit), 4-pillar (2-pillar is accepted as first audit)
- FLA (Fair Labour Association)
- FWF (Fair Wear Foundation)
- ICTI (International Council of Toy Industries)
- WRAP (Worldwide Responsible Accredited Production)
- RBA (Responsible Business Alliance)
- SIZA (Sustainability Initiative of South Africa),
- GLOBALG.A.P GRASP

Audits shall be carried out by third parties, and they must be either unannounced or semi-announced.

The list of countries at risk of social responsibility in force at the time: <https://s-ryhma.fi/en/for-suppliers/chain-supplier> Responsible procurement: Amfori BSCI Countries' Risk Classification.

Where the Buyer acts as an importer, the Buyer requires that for fresh fruit and vegetables grown in Italy, Spain, Portugal and Greece, the Supplier shall document that the premises of all growers are regularly inspected in accordance with the Global G.A.P. GRASP assessment or an equivalent third-party scheme for assessing working conditions in primary production.

6 Traceability of Products

Suppliers must have a functioning and described traceability system with which raw material batches and packaging used in the manufacturing of products and the suppliers thereof can be identified.

Upon the request of the Buyer, the Supplier must be able to provide the Buyer with information on the origin of the product and its raw materials as well as on the entire supply chain (names of manufacturing plants and packagers) all the way to primary production (information on primary producer).

In case of health hazards or suspected health hazards, the Supplier must give the Buyer the information on the batch in question without delay, and in other cases within 48 hours.

7 Organic Production Methods

In accordance with European Union/European Economic Area and Finnish legislation, a Supplier of organic products operating in the European Union must be a member of the control system for organic products.

The Supplier must provide the Buyer with a documented report of the Supplier's membership in the control system for organic products in accordance with European Union/European Economic Area and Finnish legislation and must inform the Buyer of the name and identity code of the body monitoring the Supplier.

If the Buyer is an importer of organic products in accordance with European Union/European Economic Area and Finnish legislation, the Supplier is responsible for ensuring that imported organic products include an organics productions inspection certificate (Certificate of Inspection for Products from Organic Production into European Community) prescribed in the European Union/European Economic Area and Finnish legislation in the TracesNT system maintained by the Commission. The Supplier is responsible for ensuring that the requirements for importing the product are met.

The Supplier's risk assessment must cover the supply chains of organic raw materials and verify that no prohibited plant protection products are present in organic products.

8 Product Temperature Requirements

The product-specific temperature requirements are defined in the product specifications.

9 Genetically Modified Vegetables

If fresh vegetables are genetically modified, the Supplier must inform the Buyer thereof in writing in advance.

10 Products Manufactured or Produced in the Palestine or Israel

A product can only be marked as originating from Israel if it has been manufactured or cultivated in the territory of the state of Israel as determined by the United Nations in 1948. If a product has been manufactured or cultivated in the so-called Occupied Palestinian Territories, the Supplier will

mark the product's origin as 'manufactured in the Occupied Palestinian Territories' or 'produced in the Occupied Palestinian Territories'.

11 Use of sub-suppliers

The Supplier is responsible for the performance of its sub-suppliers as if it were its own. The Supplier must oblige its sub-suppliers to comply with the terms of this agreement. Thus, the Supplier is obliged, inter alia, to ensure that its sub-suppliers also comply with the Buyer's quality and responsibility requirements in their own activities and the Supplier shall remain responsible for compliance with these requirements by its own sub-suppliers. The Supplier is obliged to regularly monitor the activities of its sub-suppliers.

12 Date and Signatures

This agreement has been executed in two identical counterparts, which have been reviewed, approved and signed by each party. Each party has received one original counterpart signed by both parties.
