

Menu Allergens

PLEASE NOTE:

Bob Evans' menu is diverse and contains a wide variety of foods, many of which contain one of the nine major allergens: milk, egg, soy, wheat/gluten, sesame, peanuts, tree nuts, shellfish, and fish. While we have carefully reviewed our ingredients to inform our customers of foods that contain an allergen as part of the ingredient list, we cannot guarantee that cross-contact with other foods will not occur during preparation (i.e., use of common fryer), or that any menu item can be completely free of allergens. At Bob Evans, the health and safety of our guests is very important to us. Prior to placing your order, please alert the manager of any food allergies.

Oil used for grilling & deep frying consists of soybeans. Although soybean oil is technically not an allergen, due to varying sensitivities, Bob Evans has chosen to include items that are cooked in and/or contain soybean oil. Fried items use a common fryer, thus cross contamination amongst allergens may occur during preparation.

Coconut is included as an allergen under the "Tree Nuts" category

Allergen information is updated periodically. However, we encourage anyone who has questions or concerns regarding allergens and special dietary needs to contact us using the online contact form at <https://www.bobevans.com/contact>
