SCRUM AT LUMIFY WORK

Scrum is today's most popular Agile project management and project development methodology/framework. It is an adaptive, iterative, efficient, and effective framework designed to deliver significant value quickly and throughout a project. Scrum ensures transparency in communication and creates an environment of collective accountability and continuous progress.

Lumify Work offers the most popular Scrum course, Scrum Master, as well as Scrum Product Owner and more.

WHY STUDY THIS COURSE

In addition to the Scrum Master, another key role on the Scrum team is the Product Owner, who provides the business vision and requirements for the service and/or product.

This two-day Agile Scrum Product Owner certification course will provide you with the core concepts and practices of Agile and Scrum. It will also equip you with knowledge of the fundamental Product Owner accountabilities and responsibilities, as well as the skills for how to effectively manage the product backlog.

Throughout this course, you'll learn about the core concepts and practices intrinsic to being an Agile Scrum Product Owner. This course also fully prepares you for the exam leading to the Agile Scrum Product Owner certification.

Exam and Certification

- One-hour, closed book
- Consists of 40 multiple-choice questions
- A passing score of 65% (26 correct answers) is required

WHAT YOU'LL LEARN

Upon the successful completion of this course, you will understand:

- › Basics of Agile project management
- › Basics of the Scrum framework
- › What it means to adopt value-driven product planning
- › Fundamentals of the product owner role

AGILE AND SCRUM

Agile Scrum Product Owner (ASPO)

- › What it means to apply effective product backlog management, and why this is important

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.

Great job Lumify Work team.

AGILE AND SCRUM

Agile Scrum Product Owner (ASPO)

COURSE SUBJECTS

This Agile Scrum Product Owner certification course is the only course that offers:

- Practical hands-on exercises in each module so students can view and assess their own existing products or projects through an Agile lens
- Interactive group exercises to promote collaboration so participants can share their own experiences, challenges and solutions with their peers while applying the course content
- A comprehensive self-assessment so course participants can assess their own, or their organisation's current skills and capabilities relevant to the Product Owner role to help determine strengths and weaknesses and to identify development/improvement opportunities
- A highly focused, in-depth approach to describing how the Product Owner role fits within the bigger picture of Agile and Scrum along with other roles in IT
- Course content featuring the most relevant and up-to-date information, including the most recent updates to the [2020 Scrum Guide](#)

Lumify Work Customised Training

We can also deliver and customise this training course for larger groups saving your organisation time, money and resources.
