LENGTH

**5 days**

## APMG INTERNATIONAL AT LUMIFY WORK

APMG International is an award-winning Examination Institute. APMG accredits professional training and consulting organisations and manages certification schemes for knowledge-based workers. APMG has a global reach, with regional offices located around the world.

## WHY STUDY THIS COURSE

*This Combined course is also available as two separate courses: [PPC Foundation](#) and [PPC Practitioner](#).*

Planning, monitoring and control are critical aspects of project management. Implemented effectively, project success rates can increase dramatically. Implemented poorly, project scope, schedule and costs can quickly overrun. Until now, there has been very little guidance for practicing and aspiring planning and control professionals to gain understanding of best practice, and how to apply it.

Our Project Planning & Control certification scheme has been developed in partnership with the Association for Project Management (APM) and is based on their guide *Planning, Scheduling, Monitoring and Control – The Practical Project Management of Time, Cost and Risk*.

The guide is APM's first comprehensive set of guidance and best practice for project planning and control and is applicable across all industries and sectors. It is an output of their Planning, Monitoring & Control Specific Interest Group (SIG) and is based on practitioner experience from both customer and supplier perspectives.

The intention of the guidance is to help raise understanding so that standards can be set by organisations against a common text to ensure that they can assure a set standard and aim for best practice as well as get value for money from their projects.

Individuals undertaking training will gain an understanding of effective planning & control standards, and best practice.

To book this bundle, add both courses to your cart. The bundle pricing will be applied on your invoice.

*Note: Please be aware bundle pricing is not currently supported when purchasing via credit card on the Lumify Work website. If you wish to pay via credit card please contact us at [ph.training@lumifywork.com](mailto:ph.training@lumifywork.com).*

# Project Planning & Control™ (PPC) Foundation and Practitioner Combined

*My instructor was great being able to put scenarios into real world instances that related to my specific situation.*

*I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.*

*I learnt a lot and felt it was important that my goals by attending this course were met.*

*Great job Lumify Work team.*

## Examination

This course pricing includes vouchers for the PPC Foundation Exam and PPC Practitioner Exam which can be taken via remote proctor. Practice exam papers are provided in the course, and reviewed to assist in preparation.

The Foundation exam is:

- 40 minutes
- 50 multiple-choice questions
- Closed book – no other materials are allowed
- Requires 50% (25 marks) pass to attain certification

The Practitioner exam is:

- 3 hours
- Complex multiple-choice questions
- Open book (*Project Planning & Control Guide* only)
- 80 marks, comprising 8 questions worth 10 marks each
- Requires 50% (40 marks) pass to attain certification

## WHAT YOU'LL LEARN

Be an informed member of a Project Support Office or Planning & Control team, and thrive in a Project Support team environment.

Project Planning & Control guidance and training will:

- Give a step by step controls guide from project initiation to execution
- Provide a holistic overview of the interdependencies between planning and control functions
- Be a practical and scalable companion to any project control professional
- Enable effective capability growth for delivery organisations

# Project Planning & Control™ (PPC) Foundation and Practitioner Combined

## COURSE SUBJECTS

The key things you will learn:

- The approaches and products used to gain a clear definition of a project
- The approaches and techniques used to plan and close a project
- The scheduling techniques and appropriate presentation of the outputs
- The management of risk in the planning, execution and evaluation of a project
- The practices used for rigorous monitoring to enable proactive control of the project
- The basis for good record keeping, which also facilitates the virtuous feedback and learning cycle
