WHY STUDY THIS COURSE

Adobe Illustrator® enables you to create professional vector graphics for posters, flyers, logos, infographics, web banners and icons, packaging, and even fashion design. Using the latest version, Illustrator CC2023, you'll learn how to draw, combine, and edit shapes to create patterns, gradients, and vibrant effects such as glows and drop shadows. We'll share time-saving techniques and best practice workflows. Illustrator is also a powerful typographic tool so you'll learn how to enter, import, and (most importantly) style your text to make your message stand out.

To fast-track and reinforce your Illustrator training, City Desktop has developed their own courseware (step-by-step workbooks) that you can take with you after the course.

City Desktop Public Schedule

With Lumify's recent acquisition of City Desktop Training, we're pleased to now offer you an extensive public schedule of Adobe end user training in Australia, New Zealand, and the Philippines. As we move to consolidate our offerings, you can access the schedule of the most closely aligned courses and book, by clicking on the link below.

- After-course support

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.

Great job Lumify Work team.
