

# Top 5 Reasons

## Why You Should Use the SAP® Live Access Environment

For anytime, anywhere learning, you choose SAP® Learning Hub – a cloud-based enterprise learning solution. But when you're ready to practice what you've learned with a live, configured IT system, it's time to take the next step: SAP Live Access.\* In this secure, hosted environment, you can test, validate, explore, and get hands-on practice with SAP software.

With SAP Live Access, you can:

1

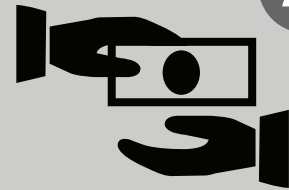

### Access training systems from SAP

When you use SAP Live Access, your system environment is specifically configured for the course you are studying. There's no need to spend hours setting up a system for a training environment. Just launch and learn.

2

### Pay only for what you need

You can purchase access in blocks of 20 hours. Each block gives you up to 30 days to carry out exercises or explore the fully configured system. Whether you're preparing for a user engagement, studying for a certification exam, or just experimenting with SAP software, the system is there for you whenever you need it.

3

### Prepare for certification exams

With SAP Learning Hub, you can access handbooks to study and use learning rooms to ask questions. Then, you can test your skills on SAP Live Access.

4

### Prove that practice makes perfect

Benjamin Franklin once said, "Tell me, and I forget. Involve me, and I learn." With SAP Live Access, you can go beyond studying a topic to actually performing the task or trying out your new skills.

5

### Learn from the experts

The SAP Education organization is one of the largest IT training providers in the world and has exclusive access to developers of SAP software. With SAP Live Access, we share our knowledge, skills, and systems directly with you – helping you increase the return on your educational investment.
