SAP Solution Brief
SAP Learning Hub, Business Edition

Enable Your Workforce Effectively, Equipping Them with an Overview of Software Knowledge

THE BEST RUN **SAP**

Empower your entire business with SAP® Learning Hub, business edition

Rapid adoption of new technology can help streamline business processes, boost productivity and satisfaction, reduce costs, and drive a faster return on your investment. **Unleash the full power of SAP® solutions** throughout your entire company with relevant, up-to-date online learning designed by SAP experts, and watch productivity increase with SAP Learning Hub, business edition.

The business edition of SAP Learning Hub is a comprehensive, digital platform that provides base-line knowledge about SAP software solutions – all in one place. With this fully digital platform, you can access all needed learning materials anytime, right from your desk, and get baseline knowledge about any SAP solution.

The business edition of SAP Learning Hub allows anyone in your organization to become familiar with SAP software through a complete suite of enablement material. It includes the visual SAP Learning Journey guide for overview knowledge and access to SAP Learning Rooms, a vast library of self-paced digital learning resources. The business edition also comprises learning-management system functionality and the option for hands-on practice on live learning system.

Empower your entire business with SAP Learning Hub, business edition

Gain state-of-the-art access to learning, content, and services

The business edition of SAP Learning Hub is helpful for companies of any size, from small and midsize companies to large enterprises.

Learners can start their learning with SAP Learning Journey guides – interactive, visual maps illustrating recommended paths to achieve learning goals. SAP Learning Hub, business edition gives learners access to "Start with an overview" scenarios in the SAP Learning Journey guides.

The business edition of SAP Learning Hub also provides access to SAP Learning Rooms – social and collaborative online forums led by SAP experts – which enable the exchange of ideas and deliver guidance and advice through live sessions, video tutorials, best-practice documentation, blogs, and more.

Subscribers can also practice in an optional, live, fully supported learning system environment – the SAP Learning System Access portal – preconfigured with data for completing course exercises in SAP Learning Hub.

Gain state-of-the-art access to learning, content, and services

Gain additional versatility in the private cloud

Combine SAP content with your own in the private cloud

SAP Learning Rooms maximize the educational experience for all learners.

Gain additional versatility in the private cloud

An option for 100 or more subscribers, the private cloud version of SAP Learning Hub, business edition, provides additional features. You can:

- Quickly implement the hub's comprehensive learning experience, content, and service platform and build role-specific learning paths for groups of learners
- Assign paths, set deadlines for their completion, and generate reports on learners' progress
- Readily create your own content to share with learners

The private cloud version also provides access to learning reports and analytics with the [adoption dashboard for SAP Learning Hub](#).

In addition, the private cloud version lets you build private online SAP Learning Rooms to share knowledge throughout your organization and help ensure seamless transitions between project phases. Your private SAP Learning Rooms can provide both structured and unstructured opportunities for social learning and collaboration. Choose from multiple templates, based on learning-room best practices, to create a training environment that meets your needs.

To facilitate learning even more, you can combine your own content with standard content from SAP.

Gain state-of-the-art access to learning, content, and services

Gain additional versatility in the private cloud

Combine SAP content with your own in the private cloud

Combine SAP content with your own in the private cloud

With the private cloud version of SAP Learning Hub, business edition, you can combine your own content with standard content from SAP. This enables you to design a clear path to standard learning content for learners and dramatically reduce the time they need to take full advantage of your software.

The large volume of standard learning content, available in multiple languages, includes navigation and overview courses, process and transaction courses, and simulations of standard transactions within SAP solutions.

If you are a private edition subscriber, you can include this content, as well as your own learning content, to the portal and distribute it.

Gain state-of-the-art access to learning, content, and services

Gain additional versatility in the private cloud

Combine SAP content with your own in the private cloud

Run, manage, and measure the enablement of your organization.

Promote high adoption and boost productivity all year long

By providing immediate access to role-specific content, the business edition of SAP Learning Hub helps learners apply SAP technology more quickly. A structured and continuous self-study program helps learners keep their skills and knowledge fresh all year long.

One subscription gives you quick access to all the learning experiences, content, and services you need to manage employee training, including up-to-date training materials and social learning provided through public learning rooms.

Plus, the private cloud version provides access to private learning rooms. With these tools and services, you can:
• Rapidly adopt new technologies and innovations
• Accelerate time to value for your technology and HR investments
• Quickly boost productivity and learner satisfaction
• Reduce process costs, user errors, and enablement expenses
• Achieve a faster return on investment at a reduced cost for technology adoption
• Speed up process execution and increase the productivity of your organization

Summary
The business edition of SAP® Learning Hub is a comprehensive, digital platform that offers baseline knowledge of SAP software solutions to anyone who's interested – all in one place. As a fully digital platform, you can access all needed learning materials anytime, right from your desk, and get the expertise you need for any SAP solutions.
