

Proving Grounds Enterprise & Teams

The Most Realistic Pentesting Labs

Proving Grounds Enterprise Edition is the most sophisticated simulated pentesting environment on the market. With infrastructure capacity capable of supporting up to 40 users, it's 100% dedicated to your organization.

An assigned administrator from your organization will have access to all lab walkthroughs. They can grant access to any number of users to accommodate new users, cross-functional teams, and any other changes that may occur throughout the year.

Who is PG for?

- Systems and Network admins
- Security architects, analysts, & engineers
- Web Application Developers
- Software Engineers
- Exploit development researchers Information
- Security Consultants

Why Proving Grounds?

• REALISM

- Interesting pivots and expanding possibilities
- Recreates corporate network environment
- Difficulty ranges from easy to expert

• DYNAMIC UPDATES

- Our labs grow as we discover new exploits
- New exploits added quarterly
- Real-world scenarios

• DIVERSITY

- Multiple OS & Attack Vectors
- Built with a broad range of security and IT roles in mind

Attack Simulations Include:

- Man-in-the-middle attacks
- Server message blocking (SMB)
- Phishing emails
- Web and mobile apps
- File server attacks
