

New training subscriptions

Learn One & Learn Unlimited

Subscription Plans

- + Workforce Development**
The cybersecurity training platform provides learning paths across offense cyber work roles, enabling orgs and learning institutions to upskill and develop cybersecurity professionals with OffSec's world-class courses and hands-on, skill based labs.
- OffSec Fundamentals**
Fundamentals are the necessary building blocks for those looking to better understand or dive into Infosec. They will allow orgs to widen the aperture of candidate pipelines and help improve competency across a baseline of Cybersecurity Fundamentals.
- + Exclusive Access**
Subscription customers will have access to exclusive content that is only available to subscription customers.
- + More Flexibility**
Students can choose from a variety of complete cybersecurity courses, training anytime, anywhere. Everything you need for an integrated learning experience is in one place.
- + Early Access**
With monthly releases of new content, subscription customers will have first access to new course content, practice labs, learning units, future workshop content, and thought leadership.
- + Integrated Learning Experience**
Learn from a common UI to access book, videos, course labs, and your personal notes.
- + Student Success Analytics**
Qualifying enterprise customers can track student progress and certifications.
- + Proving Grounds Practice**
Sharpen pentesting skills in a standalone, private lab environment, with unlimited time and machines designed by OffSec experts.
