PRINCE2 is a process-based approach for project management, providing an easily tailored and scalable method for the management of all types of projects, across industries, both locally and internationally. The continued international development of PRINCE2 examinations, training and course material is contributing significantly to the recognition of PRINCE2 as a truly relevant and international project management standard.

Lumify Work is an Accredited Training Organization for PeopleCert courses and certifications including PRINCE2.

**WHY STUDY THIS COURSE**

*This Practitioner course usually runs consecutively with PRINCE2 Foundation as a five-day Combined course at a reduced price.*

PRINCE2® 7th Edition seeks to respond to changes that have taken place in the world and in the discipline of project management since the previous update in 2017.

The essence of PRINCE2 remains - with principles, practices (previously called themes), and a set of processes that comprise the lifecycle of a project. The 7th Edition has evolved to meet the demands of the digital revolution, the speed of change, the rise of Agile ways of working, and the increased volatility and uncertainty of all aspects of life. PRINCE2 7th Edition equips project managers with the tools, knowledge, and flexibility to effectively manage projects in today's dynamic environment. It provides guidance on integrating Agile practices, tailoring the method, focusing on benefits realisation, and offers practical case studies to support project managers in successfully delivering Agile and digital transformation projects.

**What is PRINCE2?**

- It is a structured method for managing projects that is flexible, adaptable, and tailorable.
- It can be applied to any project, regardless of the purpose, scale, type, organisation, geography, or culture.
- It is practical, flexible, scalable and repeatable.
- It provides the “how to” for managing successful projects.

**What's new?**

- Integration of people - People are central to successful projects and now they are integrated into the PRINCE2 method.
- Project performance - Sustainability has been added as a seventh aspect of project performance to reflect modern organisational needs.
