SCRUM AT LUMIFY WORK

Scrum is today's most popular Agile project management and project development methodology/framework. It is an adaptive, iterative, efficient, and effective framework designed to deliver significant value quickly and throughout a project. Scrum ensures transparency in communication and creates an environment of collective accountability and continuous progress.

Lumify Work offers the most popular Scrum course, Scrum Master, as well as Scrum Product Owner and more.

WHY STUDY THIS COURSE

Scrum is the most popular Agile project management and project development methodology/framework in use today. The Scrum Framework, as defined in the *Scrum Body of Knowledge Guide (SBOK™ Guide)* is widely used across portfolios, programs, and projects in any industry, for products, services and any other deliverables to be developed.

Within a Scrum team, the Product Owner role is a core role that is critical for success. The Product Owner communicates the prioritised business requirements to the Scrum team, creates the prioritised backlog and defines the acceptance criteria. The Product Owner also delivers business value to the Customer through incremental product releases.

This is a highly engaging course that provides participants with a detailed understanding of the role of a Product Owner in a Scrum Team. The Product Owner represents the interests of the stakeholder community to the team. The Product Owner is responsible for ensuring clear communication of product or service functionality requirements to the Scrum Team, defining Acceptance Criteria, and ensuring those criteria are met. The Product Owner must understand and support the needs and interests of all stakeholders, while also understanding the needs and workings of the Scrum Team.

A copy of the *SBOK Guide* will be provided to all participants of this training course.

Examination

This course pricing includes an exam voucher to sit an online proctored exam through SCRUMstudy. The voucher is valid for 180 days. The exam format is:

- Multiple choice
- 120 minutes duration
- 100 questions
- No negative marks for wrong answers

AGILE AND SCRUM

Scrum Product Owner Certified (SPOC™)

After passing the exam, successful candidates will be awarded the Scrum Product Owner Certified (SPOC) certification by SCRUMstudy. Each student's certificate will also be provided to them by SCRUMstudy.

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.

Great job Lumify Work team.
