

NEW LP® SMARTFLASH™ METAL PAN FLASHING

LP SMARTFLASH metal pan flashing has been specifically designed to integrate with LP SmartSide Nickel Gap siding. This piece of primed non-corrosive metal is used to help reduce moisture intrusion into the joints/seams between two adjacent lengths of Nickel Gap Siding.

Images to the right illustrate the use of SMARTFLASH metal flashing with Nickel Gap siding.

- A portion of the flange located on back of siding has been removed to receive flashing.
