

REASONS TO BUILD WITH

Passion for Forestry

LP's forest management standards promote reforestation and soil conservation, and maintain water quality, fish and wildlife habitats.

Product Consistency

Unlike traditional lumber, our EWP products are consistently straight and resist splitting and delamination, which can help builders save time by easing installation on the job site.

Built on a Firm Foundation

We pioneered the oriented strand board over 40 years ago. And 20 years ago we began manufacturing LP® SmartSide®, a premium engineered wood siding that resists fungal decay and termites.

Committed to the Community

We strive to create a real impact within communities by being actively involved in neighborhood projects and local charitable giving.

Our People

With over 4,500 employees and more than 30 locations across North and South America, we're here to help get you the products you need, when you need them. Our team of knowledgeable professionals truly makes the difference.

Best Warranties

We have some of the best warranties in the industry. See LPCorp.com for complete warranty details.
