

Director, Operations, Vancouver BC

Creative Energy Overview

Recognized as a market leader in innovative and low carbon energy solutions, Creative Energy designs, builds, owns, and operates sustainable district energy systems across Canada. In addition to owning and operating one of Canada's largest thermal networks in downtown Vancouver, we provide value to developers, landowners, end-users, and the broader community through flexible thermal and electrical neighbourhood energy systems. Our innovation and ability to tailor low carbon energy solutions to our clients' needs is our competitive advantage; projects in service or being developed include ocean-source and geo-field heat exchange systems and large scale electrical thermal energy generation. Creative Energy is always looking for talented people to bring new ideas, forward-thinking and the motivation to help shape the growth of our business in BC and beyond.

Role Overview

Creative Energy is looking for a Director, Operations to lead and support the Operations team. The role is dynamic, requiring collaborative and cross-functional engagement to develop, operate, maintain, and optimize all Creative Energy operations. Operational health and safety, compliance and reliability of all systems is key. The position requires a good understanding of all regulatory requirements as overseen by Technical Safety BC (TSBC), a strong operations background, and an ability to build and maintain strong working relations with internal staff, the Union membership, customers, stakeholders, and key external entities, such as the City of Vancouver and TSBC.

Key Responsibilities

Reporting to the President and CEO, the role is responsible for the Health and Safety, Operational Leadership management of the operating, maintenance, and capital budgets.

Qualifications

- A Mechanical Engineer or a Power Engineer (Second Class)
- 15-20 Years' experience in operating large steam generation and distribution systems
- Excellent oral and written communication skills,
- Exceptional collaborative and interpersonal skills,
- Experience in process operations with the ability to oversee large capital projects,
- Experience in maintenance planning
- Human Resources and Health and Safety background
- Solid time management, organizational and planning skills
- [Contract Negotiations experience]
