

SR. PROJECT MANAGER (OAKRIDGE ENERGY), VANCOUVER, BC

Opportunity Overview

Oakridge Energy (<http://www.oakridge.energy/>) is a Limited Partnership between Corix Utilities and Creative Energy. The partnership is developing a large low-carbon district energy system to provide space heating, domestic water heating, and space cooling to meet the needs of the entire Oakridge Centre redevelopment.

A GeoExchange system would serve the entire development, reducing greenhouse gas (GHG) emissions by approximately 68% (approx. 6, 200 tonnes per year) when compared to traditional solutions, and improving energy security in a manner that maximizes opportunities for its residents, businesses, and institutions.

Oakridge Energy's innovative approach would efficiently produce reliable, local energy with tangible environmental benefits for Vancouver for decades to come.

Successful applicants can expect a competitive salary and comprehensive benefits package, as well as an opportunity to work on high profile, large scale development projects within an entrepreneurial organization using cutting-edge technology.

Key Responsibilities

Based in Vancouver, BC and reporting to the **General Manager** of Oakridge Energy, the **Senior Project Manager** will lead the delivery of this cutting-edge low carbon district energy project. You will be directly responsible for the detailed design, construction, commissioning, and closeout of the project. You will work closely with stakeholders, developers, world-class consultants, and contractors to deliver unique carbon-neutral infrastructure, providing heating and cooling to buildings for decades to come. The project presents a wide variety of challenges and will require a Project Manager who can synthesize project goals, regulatory parameters, policy shifts, a complex risk landscape, project economics and be able to communicate readily with all the parties who touch the project in order to build a collaborative work environment and drive towards success.

The ideal candidate for this position will be someone with an entrepreneurial spirit, who is ready to roll up their sleeves and get their hands dirty. Besides the people and organizational skills to successfully manage these projects, the ideal individual will appreciate the opportunity to make a difference in the world.

- Responsible for project related risk management duties
- Oversees the engineering, procurement and construction contracts

- Coordinates with design teams and internal staff
- Oversees construction and commissioning activities
- Provides support for regulatory processes
- Coordinates with external resources and key stakeholders

Qualifications

- Degree in Chemical/Mechanical/Civil/Electrical Engineering
- Professional Engineer Designation (P.Eng)
- 8+ years experience delivering infrastructure projects in excess of \$20MM.
- Expertise with project stakeholders to ensure seamless delivery of critical objectives
- Certification in project management methodologies such as PMP an asset
- Experience with public sector projects and utility experience an asset
- Exceptional collaborative interpersonal skills
- Excellent written and verbal communication skills
- Solid time management, organizational and planning skills
